Approval of Final 2023 Qualified Allocation Plan

1. Summary of Issues

At the June 16, 2022 meeting, the Rhode Island Housing and Mortgage Finance Corporation (“RIHousing”) Board of Commissioners preliminarily approved a proposed draft and authorized publication of RIHousing’s intent to adopt the 2023 Qualified Allocation Plan (the “2023 QAP”), which governs the allocation of low-income housing tax credits (“LIHTC”). On June 20, 2022, RIHousing published notice of a public hearing on the proposed draft of the 2023 QAP in the Providence Journal and Noticias Rhode Island, and on June 20, 2022, notice was posted on RIHousing’s website.

A public hearing was held on July 13, 2022 via video conference with approximately 10 attendees. Written comments were received from two parties.

Staff proposes additional changes to the proposed draft of the 2023 QAP as summarized below to address public and Credit Committee comments and to correct some clerical errors.

Section III (pages 26 and 30 of blackline)	Restore Total Development Cost (“TDC”) cap
Section III(A) (page 31 of blackline)	Add language referring applicants with hybrid transactions (4%/9%) to a Program Bulletin outlining hybrid transaction requirements
Section III(A) (page 31 of blackline)	Add specific reference to the use of gap financing in mixed income LIHTC transactions
Section III(B) (page 31)	Updated Scoring Summary
Section III(B) – Financing Points (page 32 of blackline)	Increase points for TDC efficiency from 20 to 25 points
Section III(B) – Financing Points (page 34 of blackline)	Add points for the creation of 3 bedroom or larger units
Section III(C) – (page 44 of blackline)	Clarify the Walk-Score criteria to reflect updated conditions as applicable

The final 2023 QAP is set forth at Attachment C. The 2023 QAP will become effective upon (i) final approval by the Board of Commissioners; (ii) approval by the Governor; and (iii) posting to the RIHousing website as a guidance document.

2. Summary of Public Comments

Comment 1

We received several comments from the public and one from the RIHousing Credit Committee regarding elimination of the absolute Total Development Cost (TDC) per unit limit.

We received two written and two verbal comments voicing approval of the recommendation in the Draft 2023 QAP to eliminate absolute TDC caps. Respondents pointed to both Connecticut and Massachusetts which have eliminated TDC per unit caps and the volatile construction market which has driven up construction costs over the past 24 months. These four respondents also requested that should TDC caps be reinstated extraordinary conditions should be excluded from the TDC per unit cap, similar to the exclusions allowed under the weighted average score. The respondents' list went beyond the current extraordinary costs in the QAP and sought to include ledge removal and historic preservation costs. Conversely, the Credit Committee voiced concern about the elimination of TDC caps due to national concerns related to cost containment.

Staff has (i) analyzed transactions that have either closed recently or have recent pricing and (ii) reviewed national data related to construction costs to better understand actual costs for recent transactions. Staff also reviewed both the Connecticut and Massachusetts QAPs to understand their approach to cost effectiveness. While the Massachusetts QAP doesn't have a TDC cap, they do have per unit subsidy limits and LIHTC limits, and the Connecticut QAP has construction cost per square foot limitations. In review of actual costs for RIHousing funded projects, there is variance in the percentage increase from 3% to 12% in cost based on the type of construction.

Therefore, as requested by the Credit Committee of the Board of Commissioners, staff is reinstituting the TDC cap from the previous QAP and increasing it by 10%. The new unweighted absolute TDC per unit will be \$429,000 net of reserves. The TDC per building types used to determine the weighted average for scoring purposes are also being modified. To incentivize developers to be considerably lower than the caps, we are simultaneously increasing points for cost effectiveness using the weighted average TDC.

Comment 2

The commenter Messoletta Development Corp. provided 8 written comments, one of which included TDC caps and was addressed in Comment 1.

- a. **The commenter suggests that “projects in cities and towns that are not at the 10% levels should be given first priority when awarding credits regardless of project scoring.”**

The QAP is a statewide document with “dual and equal goals of (a) increasing the supply of affordable housing in communities that have traditionally had a lack of such housing; and (b) reinvesting in urban neighborhoods where housing may be substandard, blight is common, and the housing is part of an overall neighborhood revitalization strategy.” The current QAP scoring allocates 10 points to communities with less than 10% affordable housing.

Over the past several years, the scoring has resulted in a fairly even allocation of awards between urban, suburban and rural communities, including communities with less than 10% affordable housing. Given the statewide mandate of the QAP and the diversity of points

included within the current scoring, staff does not recommend allowing lower scoring proposals in communities with less than 10% affordable housing be given priority in awarding LIHTC allocations.

b. The Commenter questioned the allocation of 3 points for non-profit developers

In the 2021 QAP the criterion for non-profit developers was tightened to require incorporation in the state and a track record of community engagement. The points associated with this category was increased from 1 to 3 because RIHousing recognizes the value of mission-based organizations, their commitment to the communities within which they work, and their long-term commitment to affordability and community revitalization regardless of whether they are in urban or non-urban communities. No change is recommended.

c. Commenter suggests that points be given for applicants that have fee simple interest in a property since it demonstrates commitment to the project.

The current QAP requires Readiness to Proceed as one Threshold Criteria. Incumbent within this criterion is Site Control, which can be demonstrated through either a deed, Purchase and Sale Agreement or Option to Purchase. Additionally, given Choice Limiting Actions associated with certain federal funding, developers may be prohibited from purchasing a property until certain federally mandated environmental reviews are completed. Therefore, no change is recommended.

d. Commenter does not feel that the Walk Score metric accurately reflects access to goods, services and amenities since it is not updated on a regular basis.

Staff has reviewed the criteria within Walk-Score and other similar applications. Walk Score is the most comprehensive application to evaluate “walkability” but is not always updated to reflect recent improvements to an area. Therefore, we agree with the commenter and have added the following language: “consideration will be given to proposed developments where the Walk-Score information does not reflect recent changes to the area surrounding the proposed development.”

e. Commenter believes that the cost of Passive Housing construction methodologies outweighs the benefits but has a significant effect on weight of the scoring as it affects TDC.

Energy efficiency is a statewide goal and is included in several gubernatorial and legislative policies and priorities. The cost of the technology required to meet passive house specifications varies considerably. In several recent projects the additional cost was less than 5% of the total construction budget. Therefore, no change is recommended.

f. Commenter is questioning the points for provision of Supportive Services given that not all residents need or want services.

RIHousing firmly believes that its mission is both to provide housing and serve communities. Our mission statement is “RIHousing strives to ensure that all people who live in Rhode Island can afford a healthy, attractive home that meets their needs. A good home provides the foundation upon which individuals and families thrive, children learn and grow, and communities prosper.” Part and parcel to this is incentivizing developers to partner with service providers to support residents in a wide variety of ways. RIHousing does not dictate what services should be provided or require residents to use these services. The maximum number of points in this category is 4. Therefore, no change is recommended.

- g. **Commenter believes that subsidizing internet access for LIHTC eligible residents should be eliminated due to the financial burden on the project.**

The provision of internet in the QAP has been modified this year to meet the requirements of the Affordable Connectivity Program included in the 2021 Federal Infrastructure Bill which requires resident participation. Should a developer choose to participate, the cost of providing internet service to residents is less than in the 2022 QAP. In addition, the number of points allocated to the provision of internet has been reduced from 5 to 3 points. Therefore, no change is recommended.

Comment 3

The commenter S.W.A.P. provided 5 written comments, one of which included TDC caps and is addressed in Comment 1 above.

- a. **Commenter believes the points associated with graduation rates should be eliminated since it favors suburban towns that receive 10 points for less than 10% LMI units.**

Points associated with education were added last year to recognize that access to a good education can lead to lower poverty rates, increased college attendance and earning power. The previous metric was difficult to understand and measure. Graduation rates are published annually and easy to measure. The current list of graduation rates illustrates that some urban communities would receive points in this category and some non-urban communities would not earn points. We also note that there are other scoring metrics in the QAP that favor urban communities over non-suburban communities, and this is part of the balance between meeting our twin goals as outlined above in Comment 2 (a). Therefore, no change is recommended.

- b. **Commenter suggests that if we want to incentivize broadband, we should simply require it and not include in the scoring.**

Because there is a cost associated with the provision of broadband and it can have an impact on a developer’s operating budget, staff believes that it should not be mandated but rather an option that is incentivized through the scoring. Therefore, no change is recommended.

c. **Commenter questioned allocating points for the provision of mixed income units.**

Studies have shown that in Rhode Island, housing units are needed across all income bands, not just for those below 60% of area median income. In addition, studies have shown that mixed income communities can alleviate the harms of concentrated poverty, and improve services and neighborhood conditions, particularly for lower income residents. Language has been added to the QAP to ensure that for any project proposing market rate units, the gap funding request must be used to primarily support the development of the affordable units, not the market rate units. Therefore, with this additional language, staff recommends no additional changes.

d. **Commenter wants to ensure that with the elimination of in-person presentations, applicants have an opportunity to clarify questions that a reviewer may have.**

Staff agrees with this comment. As part of staff review, all applicants will be provided a written list of questions or clarifications and will have an opportunity to respond accordingly.

Comment 4

The commenter Barbara Sokoloff Associates provided 4 written comments, one of which included TDC caps and is addressed in Comment 1 above.

a. **Leveraging other financing: With the inclusion of hard debt as other financing, and the prevalence of mixed income projects, many projects maximize the points in this category with hard debt only. A project with hard debt that also leverages historic tax credits, FHLB, other innovative financing, etc. scores the same as a project with hard debt only. That seems to defeat the intent of this category.**

Staff has reviewed the scoring from the last two funding rounds and agrees that there should be an opportunity to differentiate non-hard debt sources and incentivize other sources of financing. Therefore, we recommend modifying the scoring to provide a broader opportunity to leverage points in this section.

b. **Energy efficiency/sustainability and rehab: The energy efficiency points may be disadvantaging rehab projects vs. new construction. It is much more feasible for new construction to achieve Tier III / Net Zero / Passive House; in many cases, it is impossible for rehab to achieve Tier III / Net Zero / Passive House. Maybe a point offset elsewhere for rehab using less construction materials than new construction?**

The QAP covers a broad number of categories and policy goals. There are points in the QAP that are more geared to rehabilitation than new construction (e.g., rehabilitation of blighted buildings and preservation of green fields) that balance points for passive housing. Therefore, staff does not recommend a change in this category.

c. **Special populations: We would like to see some point consideration for housing for special populations, beyond a general family/elderly population. Not households**

below 30% AMI or with supportive services (those are already addressed in the QAP), but populations that are not currently served / struggle to find housing, such as LGBTQ, etc.

Currently the QAP awards points for serving people “(i) who have income at or below 30% of median income, (ii) are homeless and coming from the Coordinated Entry List or (iii) have special needs.” Many demographic groups including LGBTQ people experience challenges identifying affordable housing, such that it would be difficult to support prioritizing any one over another. Furthermore, preferences for certain classes could raise fair housing implications. Staff does not recommend a change in this category.

Comment 5

The RIHousing Credit Committee had several comments upon approval of the draft QAP, including the elimination of TDC caps which was discussed in Comment 1.

a. Develop a policy for hybrid (4%/9%) deals and reference hybrid deals in the QAP.

Staff has prepared a Program Bulletin outlining requirements for hybrid transactions and added language to the QAP referencing these requirements. The requirements will also be included in the Developer’s Handbook. Two requirements of note are:

- To the extent feasible, units must be prorated across each project (tranche) by bedroom size based on the percentage of unit sizes in each tranche (e.g., all the 1-bedroom units cannot be in one project, while 2-bedroom units are in the other project).
- The gap funding request (i.e., non-equity) must be used primarily to support the development of the affordable units, not the market rate units.

b. Given the disproportionate number of one- and two-bedroom units approved over the past several years, consider points for larger bedroom units

Staff agrees that the scoring as currently written appears to disincentivize larger units, and while demographic data suggests that families are getting smaller, developers have conveyed that they have long waiting lists for three-bedroom units and larger. We also note that the Massachusetts QAP requires at least 10% of the units in a development to have three bedrooms. Therefore, we have added points for the provision of larger bedroom units.

c. Look at mixed income deals and the amount of subsidy per affordable unit

The Credit Committee had concerns that in certain situations it appears that market rate units are not wholly self-sustaining and are being partially subsidized with the gap financing allocated to the affordable units. Therefore, as noted in Comment 3(c) language has been added to address this concern.

3. Recommendation

Staff recommends that the Board of Commissioners approve the attached resolution adopting

the 2023 QAP and recommending the 2023 QAP for final approval and endorsement by the Governor.

4. Attachments

Attachment A

Resolution of the Board of Commissioners of Rhode Island Housing and Mortgage Finance Corporation

WHEREAS, Rhode Island Housing and Mortgage Finance Corporation (“RIHousing”) has been designated by the Governor as the Tax Credit Allocating Agency for the State of Rhode Island (the “State”);

WHEREAS, the Revenue Reconciliation Act of 1989, as amended, requires tax credit allocating agencies to allocate low-income housing tax credits (“LIHTC”) according to a Qualified Allocation Plan (the “Plan”);

WHEREAS, the Plan must establish priorities and criteria for allocating the tax credits that best meet the housing needs of residents of the State of Rhode Island and must be adopted pursuant to a public hearing and comment period; and

WHEREAS, housing needs for the State of Rhode Island have been established pursuant to the Rhode Island Consolidated Plan: 2020-2024 and are incorporated into the 2023 Qualified Allocation Plan (the “2023 Plan”).

NOW, THEREFORE, BE IT:

RESOLVED, that RIHousing adopt the 2023 Plan for the State of Rhode Island in substantially the form attached hereto at Attachment C, and hereby recommends the 2023 Plan be approved and endorsed by the Governor of the State of Rhode Island; and

RESOLVED, that RIHousing develop and distribute a Request for Proposals soliciting applications for 2023 Low-Income Housing Tax Credits pursuant to the 2023 Plan; and

RESOLVED, that the Executive Director, Deputy Executive Director, and Director of Development, each acting singly, be, and hereby are, authorized and empowered and directed to take such action as she or he, in her or his sole discretion, shall deem necessary or desirable to effectuate the foregoing resolutions.

State of Rhode Island 2023 Qualified Allocation Plan

For the Low-Income Housing Tax Credit ("LIHTC") Program

INTRODUCTION

RIHousing has been designated the responsibility for administering the federal Low-Income Housing Tax Credit ("LIHTC") Program (the "LIHTC Program") for the State of Rhode Island ("the State"). Federal law requires that a Qualified Allocation Plan (the "Allocation Plan") outlining the process for the allocation of LIHTCs be presented to the public through a hearing for review and comment. For the Governor to approve and execute, the final Allocation Plan must include input from the public hearing and comment period, as well as all available housing needs data.

RIHousing has developed this Allocation Plan to comply with the requirements of Section 42 ("IRC Section 42") of the Internal Revenue Code (the "Code") and to ensure that those developments receiving LIHTCs produce or preserve housing addressing the most pressing needs of the State. This Allocation Plan establishes the priorities that the LIHTC Program will address from among those needs and incorporates those priorities into the criteria used to evaluate all proposals. This Allocation Plan will cover the 2023 allocation year for 9% and 4% LIHTC in conjunction with tax-exempt financing that is subject to the private activity bond cap.

I. LIHTC PROGRAM SUMMARY AND REQUIREMENTS

A. Overview

There are three types of credits available to developers of affordable rental housing. The first type of credit is a 9% annual credit for the costs of new construction or substantial rehabilitation of an existing building. The second type of credit is a 4% annual credit for the cost of acquiring an existing building that involves substantial rehabilitation. Both the 9% and this 4% credit are part of the state's annual per capita allocation. The third type of credit is also a 4% annual credit for the costs of new construction or substantial rehabilitation, including acquisition, of an existing building and is made available through the issuance of tax-exempt bonds.

For further information and detailed requirements relating to the different credit types and methods of calculating the credit, refer to IRC Section 42.

B. Rhode Island Annual LIHTC Allocation Pool

Each state is awarded a limited amount of 9% LIHTCs annually. Rhode Island will receive the small state minimum or approximately \$3,000,000 for 2023, indexed for inflation. The pool of LIHTCs may be greater in any year if the allocation is modified by Congress, unused credits are carried forward or if previously allocated credits are returned or rescinded.

C. LIHTC Requirements

1. Federal Criteria

IRC Section 42(m)(1)(B)(ii)(III) requires that a preference for an allocation of credits must be given to developments serving the lowest income residents, developments which commit to the longest period of affordability, and developments located in a qualified census tract ("QCT"). Because placing LIHTC projects in a QCT risks exacerbating concentrations of poverty, the QCT preference will only be given when there is an added benefit to the neighborhood in the form of the project's contribution to a concerted community revitalization plan ("CCRP"), as outlined in Section III B. of the Allocation Plan, Scoring Criteria, under Comprehensive Community Development ("CCD").

A CCRP is a formal plan which may include but is not limited to (i) a description of the geographic scope of the community and provides a clear direction for implementation; (ii) demonstrates the need for revitalization; (iii) includes a strategy for obtaining commitments of public and private investment in non-housing infrastructure, amenities, or services beyond the development; and (iv) includes planning document elements such as demonstration of the need for revitalization, setting goals for outcomes, identifying barriers to implementation, establishing timelines and benchmarks, and identifying community partners.

A plan will not be considered a CCRP if RIHousing determines, in its sole discretion, that the plan focuses narrowly on a "single property," or that the plan was approved solely for the awarding of CCRP points.

The following 10 additional statutory requirements are included in the Allocation Plan: (i) project location, (ii) housing needs characteristics, (iii) project characteristics, (iv) sponsor characteristics, (v) tenant populations with special housing needs, (vi) public housing waitlists, (vii) tenant populations of individuals with children, (viii) projects intended for eventual tenant homeownership, (ix) energy efficiency of projects and (x) the historic nature of projects.

2. State Criteria

The State of Rhode Island Consolidated Plan is developed jointly by RIIHousing and the state's Office of Housing and Community Development. The state completed the 2020-2024 Consolidated Plan in the spring of 2020, which sets the proposed priorities and goals for housing and community development programs for the next 5 years. Among the goals are the need to develop and maintain affordable housing including housing for elders, end homelessness, address healthy housing concerns, invest in non-housing community development, provide tenant-based rental assistance and to affirmatively further fair housing. Each year, the state submits an action plan to the U.S. Department of Housing and Urban Development ("HUD") restating its goals and makes adjustments to estimated spending and output.

Statewide Planning has developed the Rhode Island Land Use 2025 Plan (the "2025 Plan") which encourages the development of designated growth centers. The 2025 Plan is located at http://www.planning.ri.gov/documents/121/lu_exec.pdf. These growth centers and development areas envision a mix of commercial and residential uses with access to services, transportation and adequate water and wastewater infrastructure. In addition, all municipalities in Rhode Island have developed affordable housing plans which identify development opportunities within these communities.

3. Housing Needs

The State faces an overall shortage of quality, affordable, safe and healthy rental homes. According to the National Low-Income Housing Coalition's 2020 Out of Reach Report, based on the most recent census data, Rhode Island has the 19th highest gap between what renters earn and what it costs to rent a two-bedroom apartment.

Much of the State suffers from a continually aging housing stock, a significant portion of which is characterized by severe or moderate physical problems such as lead-based paint hazards.

The redevelopment of properties that are in foreclosure and those that are abandoned and vacant are a priority for RIIHousing financing. Vacant and abandoned property erodes overall property values and causes deterioration in entire communities where prior investment has occurred. RIIHousing is committed to using resources where they will most efficiently be used to stabilize neighborhoods.

To meet the state's goal of at least 10% affordable housing in each community, the State must substantially increase its production. By concentrating state, federal and private resources to combine affordable housing with broader community development investments,

neighborhoods can be revitalized. This approach encourages investment in Rhode Island's urban areas and in new or existing growth or town centers and surrounding neighborhoods. This comprehensive approach to development results in well planned developments that are sustainable and efficient.

D. Eligibility Requirements

Disclaimer:

To receive an allocation of LIHTCs, whether from the State's allocated pool or through the use of tax-exempt bond financing, a project must meet eligibility requirements under both the Allocation Plan and IRC Section 42. While many of these requirements are briefly summarized below, applicants should note that the federal rules governing LIHTCs are complex. All developers are advised to consult a qualified tax attorney and/or accountant to determine eligibility for the credit. In making this determination, qualified professionals are expected to be current and knowledgeable with all private letter rulings ("PLRs") and technical assistance memoranda ("TAMs") issued by the Internal Revenue Service ("IRS") which may provide insight to the IRS view regarding eligible basis determinations.

In allocating LIHTCs, RIHousing makes no representations to owners or other parties regarding compliance with IRC Section 42, Treasury regulations or other laws or regulations governing LIHTCs. Neither RIHousing nor its employees, agents, representatives, board members, or employees shall be liable for any matters arising out of, or in relation to, the allocation of LIHTCs.

1) Residential Rental Property

In order for a project to qualify as a low-income housing project, it must be residential property. The project must be: (1) used other than on a transient basis, (2) rented or available for rent on a continuous basis, (3) available to members of the general public, and (4) suitable for occupancy. Facilities providing continuous nursing, medical, or psychiatric care are not considered residential rental units for LIHTC purposes. Continual care, however, should not be confused with certain supportive services which can be provided. Examples of allowable incidental care include: (1) facilitating the making of medical appointments, (2) providing transportation to medical facilities, (3) providing basic first-aid skills in case of emergencies, and (4) assisted living.

2) Extended Use Period

IRC Section 42 requires that the low-income occupancy and rent restrictions be maintained during the initial compliance period of 15 years (IRC Section 42(i)(1)). In addition, the occupancy restrictions must be maintained for an extended use

period of an additional 15 years per IRC Section 42(h)(6)(D). RIHousing requires the following:

- a. A Declaration of Land Use Restrictive Covenants ("Declaration") must be executed by the project owner. The Declaration must set forth an extended use period of affordability for the qualifying units of at least 30 years and an extended use period prohibition against evicting or terminating tenancy of existing tenants in low-income units other than for good cause.
- b. If a development is allocated LIHTC under the nonprofit set-aside, the owner (and any subsequent owner) during the compliance period must continue to qualify under that set-aside. The owner will indicate in the Declaration that they are electing to qualify under the nonprofit set-aside.
- c. For projects financed with tax-exempt bond proceeds, the required extended use period of affordability will be the greater of (i) the period that the tax-exempt bonds remain outstanding or (ii) 40 years.
- d. The owner must waive the right to seek termination of the Declaration by petitioning RIHousing to find a buyer of the development as provided in IRC Section 42(h)(6)(E)(i).
- e. In addition to the Declaration, RIHousing requires that a Regulatory Agreement be recorded prior to any lien documents and not be subject to termination in the event of foreclosure. The development owner may be required to have all lien holders of a development complete and sign a subordination to the Regulatory Agreement that will subordinate their liens to the provisions of the Regulatory Agreement.

3) Rent and Tenant Income Restriction

The project must meet certain tenant income and rent restrictions:

- a. Income Restrictions:

The Project must elect one of the following three Minimum Set-Asides:

at least 20 percent of the rental units in the project must be rent restricted for and occupied by households with incomes no higher than 50 percent of the Area Median Income ("AMI"), adjusted for family size.

OR

at least 40 percent of the rental units must be rent restricted and occupied by households with incomes no higher than 60 percent of the AMI, adjusted for family size.

OR

Under the Average Income Test, at least 40 percent of the units must be both rent-restricted and occupied by individuals whose incomes do not exceed the imputed income limitation designated by the taxpayer.

The average of the imputed income limitations designated cannot, according to IRC Section 42, exceed 60 percent of AMI, however, RIHousing is designating the maximum as 58 percent of AMI.

The designated imputed income limitations must be in 10 percent increments as designated in the Code.

b. Rent Restrictions:

The gross rent charged to a tenant, including utilities, cannot exceed 30% of the income limit for a qualified low-income household at 50% or 60% or, for Average Income Test elections, the applicable unit income/rent designation of AMI adjusted for family size, assuming 1.5 persons per bedroom. A table of qualified rents is located in the Developers Handbook and from HUD at <http://www.huduser.org/portal/datasets/mtsp.html> and from Novogradac at <http://www.novoco.com/products/rentincome.php>.

For more information on tenant income and rent restrictions, including rules for calculating rents, see IRC Section 42.

4) Least Amount of LIHTC Necessary for Project Feasibility

IRC Section 42 requires that RIHousing allocate credits in the minimum amount necessary for the financial feasibility of the project and its continued viability as a qualified low-income housing project throughout the credit period.

RIHousing must evaluate the amount of the credit at 3 specific times: (1) at the time of application, (2) at the time of reservation, and (3) at the time the building is placed-in-service and an IRS Form 8609 is issued. RIHousing will consider the proposal's distribution of the tax benefits between direct development costs, soft costs, fees, operating reserves and other costs and evaluate the need for LIHTCs to fill the gap after other

financing sources and subsidies have been taken into account. Developers will be required to certify the source and value of other subsidies and funding for the proposal.

5) Minimum Property Standards

Projects must meet state or local health or building codes or regulations. Corrections necessary to repair code violations must be specified in a rehabilitation work plan. The developer will be required to provide certification or to demonstrate to RIHousing that all code violations have been corrected upon construction completion. Compliance with health, safety and building codes is an ongoing obligation; non-compliance may result in penalties and/or recapture of credit.

6) Placed-In-Service Requirements

RIHousing will allocate credits only to projects which can be reasonably expected to become eligible for the credits in the year in which the Developer is to be awarded LIHTCs. This means that projects must either be able to be placed-in-service in that year or have incurred more than 10% of their reasonably anticipated project basis within 12 months of the reservation of LIHTCs. Placed-in-service generally refers to the issuance of the first certificate of occupancy for each building in the project.

7) Minimum Rehabilitation Requirements

IRC Section 42 requires that LIHTC projects meet minimum rehabilitation expenditure requirements. RIHousing requires a minimum rehabilitation expenditure of \$15,000 per unit.

8) Ten Year Placed In Service Restriction

To be eligible for the acquisition credit, buildings may not have been placed in service within the last 10 years. Generally, a transfer of the building results in a new placed-in-service date if, on the date of the transfer, the building is occupied or ready for occupancy. Exceptions may apply to certain property transfers and expiring use properties. In cases involving the purchase of a development that previously utilized LIHTCs for acquisition, the property may not be eligible for acquisition credit from the 2nd purchase until the completion of the initial 15-year compliance period.

9) Community Service Facilities

The portion of a residential building used as a community service facility may be eligible for the LIHTC Program. A community service facility is a facility designed to primarily serve individuals whose income is 60% or less of AMI. Refer to Rev. Rul. 2003-77 for more information.

10) Market Study

Prior to closing, RIHousing requires that a comprehensive market study conforming to requirements consistent with standard industry practice be conducted as a condition of credit allocation analyzing the market area, including the depth and breadth of demand, comparable properties and rates, comparable operating expenses, market absorption rates as well as a study of the needs of the prospective population. For projects involving rehabilitation of existing and occupied properties with project-based rental assistance contracts, RIHousing, in its sole discretion, may modify the market study standards to reflect actual data available to RIHousing about the operation of the project and its market area. At the Developer's expense, the market study will be completed by a disinterested party commissioned by RIHousing. A market study acceptable to RIHousing, in its sole discretion, may also be commissioned by the development investor or third-party lender. For mixed-income proposals, a third-party market study will be required with the application for LIHTCs.

11) Native American Housing Assistance

Assistance provided under the Native American Housing Assistance and Self-Determination Act of 1996 ("NAHASDA") will not be taken into account in determining whether a building is federally subsidized for purposes of the LIHTC program. Therefore, such buildings will qualify for 9% credit as deeper targeting consistent with the rules for HOME-financed projects.

12) Homeownership Option

Developers electing to convert to homeownership at the end of the 15-year compliance period may do so under IRC Section 42. RIHousing will approve no more than 1 conversion application per calendar year. As these developments will be rental housing for a minimum of 15 years, they will be underwritten as a rental development and are subject to the same underwriting criteria set forth in the Developers' Handbook.

13) Public Housing Waiting Lists

Prior to occupancy, sponsors must commit in writing that they will provide written notice to the jurisdictional Public Housing Authority (or, where there is no local Public Housing Authority, RIHousing as the Section 8 Administrator for the State) committing to the acceptance of tenant-based vouchers.

14) Tenant Populations of Individuals with Children

Sponsors are encouraged to provide housing that provides opportunities to single parent and two-parent households with children.

E. HUD Qualified Census Tracts/Difficult-To-Develop Areas

Projects located in HUD's designated QCTs or difficult-to-develop areas ("DDAs") may be eligible for additional LIHTCs. DDAs are designated annually by HUD as updated income and fair market rent ("FMR") data become available. Generally, HUD publishes the list of QCTs and DDAs on an annual basis.

If an area is listed as a HUD designated QCT or DDA 1 year and is not listed on a subsequent list of designated areas, the designation is still effective if: (1) the allocation of credit to a borrower is made no later than the end of the 730-day period after the submission to the credit-allocating agency of a complete application by the borrower, and the submission is made before the effective date of the subsequent lists; or (2) for purposes of IRC Section 42(h)(4), the bonds are issued or the building is placed in service no later than the end of the 730-day period after the borrower submits a complete application to the bond-issuing agency, and the submission is made before the effective date of the subsequent lists, provided that both the issuance of the bonds and the placement in service of the building occur after the application is submitted.

The additional credits available to projects falling within the definitions of either or both of these categories are derived by increasing the project's eligible basis for the new construction or substantial rehabilitation portion of the project by up to 30%. The actual increase in basis is determined at the discretion of RIHousing pursuant to its analysis of the maximum amount of subsidy necessary to complete the project. The 30% increase is not available for the costs associated with the acquisition portion of any project.

Pursuant to H.R. 3221 Title I – Housing Tax Incentives, Rhode Island will prioritize projects that propose housing: (i) for special needs populations, (ii) for very low-income persons and families, (iii) for general occupancy units in "areas of opportunity" as defined by HUD or are otherwise proposed to be sited in areas of the state that will promote efforts to affirmatively further fair housing, and (iv) that is consistent with the RIHousing's CCD principles including the ability to collaborate, secure and leverage non-traditional resources to maximize

financial feasibility for eligibility under the basis boost which is applicable to DDAs. Should RIHousing be given the authority, as the allocating agency, to designate properties funded with tax exempt bonds as DDAs, the same criteria shall apply.

F. HUD Subsidy Layering Guidelines

All projects submitted to RIHousing that may receive LIHTCs in combination with any form of HUD housing assistance will be subject to the subsidy layering review guidelines of Section 911 of the Housing and Community Development Act of 1992. These requirements are designed to ensure that participants in affordable multi-family housing developments do not receive excessive compensation by combining various HUD housing assistance with assistance from other federal, state, or local agencies. The guideline standards are divided into 3 categories: Builder's Profit, Developer's Fee, and Syndication Expenses, and are outlined in the Developer's Handbook. HUD has established safe harbor and ceiling standards for each of these categories. LIHTC agencies may perform the subsidy layering review function provided the agency certifies to HUD that it will properly apply the guidelines. RIHousing has assumed these responsibilities.

G. Single Room Occupancy Units

RIHousing no longer allocates LIHTC to the development of new Single Room Occupancy units.

H. Housing for the Homeless

The LIHTC has become a substantial resource for permanent supportive housing for the homeless. The portion of a building used to provide supportive services may be included in the qualified basis. Permanent supportive housing for the homeless must contain sleeping accommodations, and kitchen and bathroom facilities. Supportive services must be either: (a) located within the building or (b) be readily available to residents and well defined in a written supportive service plan outlining how residents will be connected to the services.

I. Handicapped Accessibility

LIHTC projects must comply with all applicable federal and state statutes and regulations regarding the operation of adaptable and accessible housing for the handicapped, including, but not limited to, Section 504 of the Rehabilitation Act of 1973, as amended ("Section 504") and the ADA Amendments Act of 2008, which amended Section 504.

J. Affirmative Action/Equal Employment Opportunity ("EEO")

RIHousing is committed to affirmative action and EEO. We have established minimum workforce utilization goals for Minority Business Enterprises and/or Women Business Enterprises (“MBE/WBE”) and monitor construction projects for compliance with these goals. All developments receiving funding under the rental production program must use best efforts to: (a) award at least 10% of the total construction contract dollar amount to minority and female owned businesses, and (b) ensure that at least 10% of labor hours for all trades are performed by minorities and/or women. Developers are encouraged to exceed the minimum goals set by RIHousing. Note that only those businesses included in the Rhode Island Department of Administration’s Directory of Certified Minority and Women Business Enterprises will count towards the minority and women business and workforce utilization goals. Further note that for purposes of measuring these goals, RIHousing does not include persons of Portuguese descent as a recognized minority.

All developers receiving an allocation of credits from RIHousing must enter into an Affirmative Action Agreement detailing specific affirmative action goals and definitive, aggressive strategies and action steps to ensure that such goals are achieved.

K. Fair Housing Considerations

1. Siting and Marketing Consideration

In January 2017, Treasury issued regulations providing guidance on the implementation of Title VI of the 1964 Civil Rights Act, as amended (42 U.S.C. Section 2000d, et seq.) (hereinafter, “Title VI” and its regulations “the Title VI regulations”), as it applies to programs or activities receiving assistance from Treasury. Specifically, the Title VI regulations prohibit discrimination on the basis of race, color, or national origin in programs or activities receiving federal financial assistance from Treasury. See 31 CFR Part 22. Any proposal submitted for LIHTCs must comply with Title VI and Title VI regulations.

Under federal law, individuals seeking housing may not be discriminated against based on their race, color, religion, sex, ancestral origin, familial status or disability. State fair housing laws further extend protections against housing discrimination on the basis of marital status, sexual orientation, age, gender identity or expression, veteran status, and status as a victim of domestic abuse, or by reason of association with members of any of these protected classes.

In addition to prohibiting discrimination in housing due to membership in a protected class, the Title VI also imposes an obligation on recipients of federal housing assistance to administer programs in a way that affirmatively furthers fair housing. In its administration of the LIHTC Program, RIHousing is committed to encouraging the location of affordable homes throughout the state, particularly

in geographic areas that have not reached the state affordable housing goal. RIHousing's scoring system provides incentives to achieve that result.

IRC Section 42(m)(1)(A)(ii) requires that each local jurisdiction have a "reasonable opportunity" to comment on any proposal to allocate LIHTCs to a project within that jurisdiction. In accordance with Revenue Ruling 2016-29, IRC Section 42 ensures the opportunity for local input regarding the allocation decision but does not grant a local veto or authorize an allocating agency to abandon the responsibility to exercise its own judgment. RIHousing will notify the Chief Executive Officer, or the equivalent, of each jurisdiction in which a borrower has been selected to receive federal low-income LIHTCs to provide the jurisdiction with an opportunity to comment.

In addition, in order to ensure that all potentially eligible residents of RIHousing-financed developments have a fair opportunity to gain admission to those developments, RIHousing requires that sponsors employ an open and fair process that affirmatively furthers fair housing opportunities. To that end, all homes financed by RIHousing must be available to the general public, must be marketed pursuant to an approved affirmative fair housing marketing plan ("AFHMP") and must be advertised on <http://www.housingsearchri.org>.

At a minimum, the AFHMP must include an analysis of those populations least likely to apply for housing in the area in which the development is located and a targeted marketing program to reach those populations. Such a program could include marketing in print or broadcast media targeted to such populations, outreach to organizations that serve those populations, and the like. In addition to the AFHMP, the housing must be distributed in accordance with an approved resident selection plan that is fair, open, and transparent. The resident selection plan must specify the process and timetable under which applications will be accepted, local preferences for admission, if any, the policy for initial selection of residents if the number of qualified applicants exceeds the housing available, and the waiting list policy.

The Violence Against Women Reauthorization Act of 2013, as amended, and its implementing regulations afford certain protections to victims of domestic violence, dating violence, sexual assault, and stalking, who apply for or reside in federally assisted housing, including housing financed with LIHTCs. RIHousing requires that sponsors incorporate these protections into lease forms, tenant selection plans, and resident policies relating to unit transfers and changes to family composition. On an annual basis, owners will be required to certify compliance with all applicable requirements of the Violence Against Women Reauthorization Act of 2013.

2. Limited English Proficiency ("LEP")

A limited English proficiency (“LEP”) person is one who, as a result of national origin, does not speak English as their primary language and who has limited ability to speak, read, write, or understand English. To avoid national origin discrimination, in certain situations, Title VI requires assistance for persons who are LEP so that they can effectively participate in, or benefit from, federally assisted programs. Executive Order 13166, signed on August 11, 2000, directs all federal agencies, including HUD, to work to ensure that programs receiving federal financial assistance provide meaningful access to LEP persons. All programs and operations of entities that receive financial assistance from the federal government, including but not limited to state agencies, local agencies and for-profit and non-profit entities, must comply with the Title VI requirements.

Federally assisted recipients are required to make reasonable efforts to provide language assistance to ensure meaningful access for LEP persons to the recipient's programs and activities. To do this, the recipient should: (1) conduct the four-factor analysis, (2) develop a language access plan (“LAP”) and (3) provide appropriate language assistance.

The actions that the recipient may be expected to take to meet its LEP obligations depend upon the results of the four-factor analysis: (1) the services the recipient offers, (2) the community the recipient serves, (3) the resources the recipient possesses, and (4) the costs of various language service options. All organizations should ensure nondiscrimination by taking reasonable steps to ensure meaningful access for persons who are LEP. HUD recognizes that some projects' budgets and resources are constrained by contracts and agreements with HUD. These constraints may impose a material burden upon the projects. Where a HUD recipient can demonstrate such a material burden, HUD views this as a critical item in the consideration of costs in the four-factor analysis. However, refusing to serve LEP persons or not adequately serving or delaying services to LEP persons would violate Title VI. The recipient may, for example, have a contract with another organization to supply an interpreter when needed; use a telephone service line interpreter; or, if it would not impose an undue burden, or delay or deny meaningful access to the client, the recipient may seek the assistance of another agency in the same community with bilingual staff to help provide oral interpretation service.

Plans for assisting LEP persons should be included in the Tenant Selection Plan. For more information on LEP visit: <http://www.lep.gov>.

All developments receiving LIHTC will have to complete HUD form 935.2A to detail its AFHMP.

L One for One Replacement

Any proposal that contemplates the loss of existing deed restricted affordable homes must be accompanied with a plan outlining one-for-one replacement of

the lost affordable rental homes. Proposed replacement units must be of comparable type and affordability.

M. Industry Recommended Standards

In evaluating and underwriting housing development proposals, RIHousing is guided by or generally follows industry recommended standards developed by the National Council of State Housing Agencies (“NCSHA”). Provisions of the “NCSHA Recommended Practices in Housing Credit Administration”, updated in December 2017, have been incorporated into the Allocation Plan and/or the RIHousing Developer’s Handbook.

N. Uniform Relocation Act

Developments financed under the rental production program are required to provide for uniform and equitable treatment of persons displaced from their homes and businesses and to establish and provide for uniform and equitable relocation of any residents or businesses.

O. Non-Profit Right of First Refusal

RIHousing is committed to the long-term affordability of developments for the benefit of tenants and full compliance by applicants and principals with the provisions of the IRC, the extended use agreement and other program requirements. RIHousing similarly has an interest in preserving the right of first refusal by a qualified nonprofit organization at the close of the compliance period, as authorized in § 42(i)(7) of the IRC.

RIHousing will therefore require the following with respect to all applications:

- a) Provisions to be included in the applicant's organizational documents limiting transfers of partnership or member interests or other actions detrimental to the continued provision of affordable housing;
- b) A designated form of right of first refusal document;
- c) Terms in the extended use agreement requiring notice and approval by the executive director of transfers of partnership or member interests;
- d) Debarment from the program of principals having demonstrated a history of conduct detrimental to long-term compliance with extended use agreements, whether in Rhode Island or another state, and the provision of LIHTC in general; and
- e) Provisions to implement any amendment to the IRC or implementation of any future federal or state legislation, regulations, or administrative guidance.

The decision whether to institute, and the terms of, any such requirements shall be made by the executive director as reasonably determined to be necessary or appropriate to achieve the goals stated in this subsection and in the best interest of the plan. Any such requirements will be indicated on the application form, instructions, or other communication available to the public.

Any application submitted by an applicant containing a principal that was a principal in an owner that has, in RIHousing's determination, previously participated, on or after January 1, 2019, in a foreclosure in Rhode Island (or instrument in lieu of foreclosure) that was part of an arrangement a purpose of which was to terminate an extended low-income housing commitment (regardless whether the extended low-income housing commitment was terminated through such foreclosure or instrument) shall be rejected from further consideration for low-income housing tax credits and shall not be eligible for any reservation or allocation of credits.

II. APPLICATION PROCESS AND RANKING METHOD FOR 9% CREDITS

A. Funding Rounds

RIHousing may hold up to 3 competitive funding rounds each year for the 9% allocated credits. Funding rounds will be announced by RIHousing via Program Bulletin and/or issuance of a Request for Proposals ("RFPs"), and by advertisement in local print media. RIHousing may adjust the number or timing of funding rounds if required by the passage of federal legislation or adoption of IRS rules and regulations to accommodate variations in demand or for other compelling circumstances. Depending on the strength and number of proposals received in any funding round, RIHousing may, in its sole discretion, create an official waiting list for the LIHTC program year for proposals that demonstrate considerable merit but for which allocable credit is not immediately available. RIHousing will make the waiting list available for public inspection.

During the review period, staff will determine the need for the credit and the financial feasibility of the proposals; however, this determination is not a guarantee by RIHousing of the feasibility or viability of any proposal. In the event that RIHousing determines that the project is not feasible as proposed or that a change in circumstances has materially altered the proposal as submitted and approved, RIHousing reserves the right to rescind reservations of LIHTCs for projects. Any such rescissions shall be in writing and provided to the applicant.

The anticipated schedule for LIHTC reservations is as follows:

First Funding Round

RFP issuance	On or about October 3, 2022
Proposals submission deadline	On or about the third Friday in December 2022
Reservation decisions rendered by RIHousing's Board of Commissioners	At the April 2023 Board Meeting

Additional funding rounds will be conducted, if necessary, to allocate remaining credits or returned credits. RIHousing reserves the right to limit competition in subsequent competitive funding rounds to proposals that were submitted in the first and/or second competitive funding rounds.

RIHousing retains the right to award LIHTCs outside of competitive funding rounds to projects which were previously awarded LIHTCs and which either: (a) have returned their previously awarded LIHTCs to RIHousing for use by other developments pursuant to an agreement with RIHousing or (b) qualify for and can demonstrate a need for additional LIHTCs to meet project feasibility requirements. The projects must meet one or more of the following criteria:

- The project incurred or faces substantial, unforeseen cost increases beyond its control;
- The project is subject to a substantial unanticipated reduction in equity yield on the sale of the LIHTCs, or a substantial unanticipated reduction in leveraged debt;
- Supplemental LIHTCs would improve the project's financial feasibility and maintain its consistency with RIHousing's underwriting standards and development policies for multi-family finance.

RIHousing reserves the right to award any additional credits received during any year to qualified projects that were previously placed on a waiting list in prior rounds. RIHousing may consider making a reservation of LIHTCs for qualified application(s) received outside the context of the first or subsequent funding rounds if LIHTCs are available from the previous year. In such event, a general priority will be given to projects which best demonstrate readiness to proceed, and/or projects which have previously received credit awards from RIHousing.

B. Project Selection Process

Applicants are advised to thoroughly review the Allocation Plan, the Developer's Handbook and the application requirements when preparing their application. While RIHousing does not have a formal pre-application process, applicants are strongly encouraged to review potential applications with RIHousing staff prior to submission. It is solely the applicant's responsibility to select a preferred plan of action.

RIHousing's selection process for allocating LIHTCs is designed to select proposals which address the priorities identified in the Rhode Island Consolidated Plan: 2020-2024, the federal criteria included in IRC Section 42 and the housing needs of the State. A funding committee (the "Funding Committee") including but not limited to senior staff, and one or more representatives of the Board of Commissioners will evaluate and score applications based on the review criteria stated below.

All tax credit reservations are made based upon the information contained in the application. Upon review of the application, RIHousing staff will advise the applicant of discrepancies or incomplete items and will allow the applicant to clarify or supplement the original application. Such requests will be made in writing to the applicant who will have 10 business days to respond in writing only. **Only clarifications or missing information will be accepted, no substantive changes may be made by the applicant after the application is submitted. A substantive change may include, but is not limited to, modifying the LIHTC request, changing unit count, and adding or removing specific locations from the application.**

RIHousing staff will conduct a review to determine whether a proposal meets the Threshold Criteria (the "Threshold Criteria"). If staff determines that a proposal does not meet the Threshold Criteria, notice will be provided to the applicant prior to the Funding Committee meeting. Threshold determinations are not appealable.

Only those projects that meet the Threshold Criteria will be officially scored. Applications passing threshold will be reviewed and scored against the LIHTC priorities set forth in the Allocation Plan. After applications have been scored by RIHousing staff, but prior to presentation at the Funding Committee meeting, applicants shall be notified of their overall score. Applicants shall have the opportunity to meet with staff to discuss their project scoring and may also appeal the score prior to presentation at the Funding Committee meeting.

Aggregate assessment and score in no way guarantees an award of LIHTCs to a particular development. During proposal review and throughout the LIHTC allocation process, RIHousing will utilize its sound and reasonable judgment and will exercise its discretion consistent with sensible and fair business practices. RIHousing reserves the right not to reserve LIHTCs to any applicant or project, regardless of the proposal's aggregate assessment and score, if it determines, in its sole and absolute discretion, that 1) a reservation for any applicant or project does not further the purposes and goals set forth in this Allocation Plan; 2) available resources are not sufficient to fulfill a LIHTC request; 3) there exists an over-concentration of projects in a specific geographic location; or 4) there exists an over-concentration of specific production types (e.g. new production, assisted living, preservation or rehabilitation).

In addition, RIHousing reserves the right to adjust aggregate assessments and scores or to rescind a reservation of LIHTCs if there is a material change in the project including, but not limited to, a change in the general partner, the construction start date which adversely affects the achievement of stated goals and/or diminishes the proposal's ability to address documented housing needs or significant changes to the budget.

In the first round, RIHousing may not allocate all available credits. Credits not allocated under the first round may be allocated at a future date within the credit year to projects submitted under the initial RFP. RIHousing will request updated models and will review and re-score all proposals submitted, even those proposals that did not originally meet the Threshold Criteria.

RIHousing may elect to award a forward allocation of credits to a project provided it is determined that the project meets the objectives of the State's Allocation Plan and that such forward allocation is in the best interests of the project and RIHousing's mission and affordable housing objectives.

If RIHousing allocates LIHTCs from the LIHTC Program outside of the priorities and selection criteria set forth in this Allocation Plan, RIHousing will document and provide a written explanation of its decision to the general public.

III. LIHTC REVIEW CRITERIA

In its mission to meet the statewide need for affordable homes, RIHousing believes it to be in the public's interest to avoid concentration of affordable housing in any one neighborhood, community or corner of the State. As a small state, Rhode Island receives a relatively small statewide allocation of LIHTC. Therefore, within the goals of achieving financially feasible developments, RIHousing will generally seek to fund mid-sized developments in urban, suburban and rural communities rather than larger scale developments.

The LIHTC is the primary funding source for the development of new affordable rental homes in Rhode Island. Therefore, developers applying under the rental production program must meet the following requirements:

- (i) For new production proposals, create a minimum of 30 new units.
- (ii) For proposals contemplating preservation, 30% of the overall units in an application or 20 units, **whichever is greater**, must be newly created affordable homes.
- (iii) As the LIHTC is a highly competitive and scarce resource, no single development may be awarded more than 40% of Rhode Island's annual small-state minimum allocation. **Any application that requests more than 40% of the annual allocation will be disqualified.**

In awarding development resources, including LIHTCs, RIHousing has identified the following priorities:

1. Increase the supply of affordable housing. While the existing stock of affordable housing faces threats from expiring subsidies and use restrictions, deferred maintenance and obsolescence, the extreme need for additional affordable housing makes new production RIHousing's primary housing priority.
2. RIHousing will approve no more than one preservation transaction per funding round for 9% allocated LIHTCs.
3. Dual and equal goals of (a) increasing the supply of affordable housing in communities that have traditionally had a lack of such housing; and (b) reinvesting in urban neighborhoods where housing may be substandard, blight is common, and the housing is part of an overall neighborhood revitalization strategy.
4. Affordable homes must do more than just provide a physical structure. RIHousing identifies these goals with its CCD initiative and prioritizes developments that most effectively achieve these.
5. Because of the limited number of available subsidies, including the capital subsidy from the LIHTC, priority will be given to developments which can viably and effectively serve:
 - a. Very low-income households
 - b. Individuals and families who have experienced chronic homelessness
 - c. Individuals with special needs
 - d. Households with children.
6. Developments that best serve the needs of Rhode Island workers and businesses.
7. Developments that achieve these goals at the lowest cost.

In order to best achieve these goals, RIHousing has established 5 threshold criteria that must be met before a development can be considered for a reservation of LIHTC Threshold Criteria. The 5 Threshold Criteria are set forth here and described in more detail below. They are:

1. The developer and their development team must have experience in the successful development and operation of affordable housing of similar scope and complexity;
2. The development must demonstrate financial feasibility for at least 15 years and have a reasonable likelihood of feasibility for the entire term of financing;

3. The development must have a reasonable likelihood of achieving sustainable occupancy of 95% within 6 months of construction completion;
4. Construction must be reasonably likely to commence within 12 months of preliminary commitment and be complete within 30 months of firm commitment; and
5. The per unit TDC of the project does not exceed an absolute cap of \$429,000 per unit, not included capitalized reserves.

Only proposals that satisfy the Threshold Criteria review will be further considered under the Scoring Criteria.

A. Threshold Criteria

- 1) Development Team Capacity: The developer must have experience in the successful development and operation of affordable housing of similar scope and complexity.
 - The Developer and their development team will be evaluated on its professional capacity to plan, build, market, and operate the proposed development.
 - The performance record of the developer, consultant, architect, management agent and contractor will be measured individually and collectively by the quality and quantity of previous development, design, construction and property management efforts, as well as affirmative action records.
 - Each team member is expected to demonstrate satisfactory prior experience on projects of similar scale and complexity; to have satisfactory professional references; and to devote sufficient experienced staffing and resources to complete the proposed development.
 - If the developer does not have satisfactory prior experience, including but not limited to, the ownership and management of LIHTC projects, they must enter into a joint venture with an entity experienced with the development of LIHTC projects, or demonstrate to RIHousing's sole satisfaction how they will compensate for the lack of LIHTC experience.
 - The developer (including the ultimate borrower entity) and contractor will also be evaluated for creditworthiness and financial capacity including a thorough review of the developer's audited

financial statements for the previous 3 years. Creditworthiness takes into consideration the financial condition of an organization, management capabilities, character and capacity.

RIHousing reserves the right to deny LIHTCs to any proposal where: (i) any materially participating entity (owner or management agent) is not in good standing regarding compliance monitoring of other LIHTC projects; (ii) any partner, developer or other key development team member has been determined by RIHousing as not creditworthy; or (iii) any partner, developer or other key development team member is on the HUD or RIHousing debarment list.

RIHousing will review each developer's most recent audit to ensure financial capacity to develop the project and manage the development for the long term. In addition, developers will be evaluated based upon the prior performance of existing developments both in RIHousing's portfolio and those financed by others. This review will include: 1) condition and security of existing developments; 2) maintenance and operating of existing developments; 3) leasing and occupancy history; 4) general management practices; and 5) financial management. A credit report will be required for all principals of for-profit developers participating in the LIHTC program.

For service-enriched housing proposals, development team members will also be evaluated on the basis of demonstrated success in: (i) the development, design and construction of housing with supportive services; and (ii) the planning and delivery of services including adequacy of staffing and/or oversight of third-party contracts for services.

2) Financial Feasibility: The development must demonstrate financial feasibility for: (i) the overall development costs of the project and (ii) the long-term operation of the proposal.

- As to development costs, applicant must demonstrate that the proposed budget is adequate and realistic for the proposed project.
- In regard to operations, the proposal must demonstrate financial feasibility for at least 15 years consistent with RIHousing's underwriting guidelines and have a reasonable likelihood of feasibility for the entire term of financing.
- RIHousing reserves the right to deny LIHTCs to proposals for which adequate funding sources have not been identified for all development costs or development costs do not appear to be consistent with the scope of the proposal. This includes a

commitment of syndication. While commitments from these sources do not have to be secured before applying for LIHTCs, the applicant must be able to demonstrate to RIHousing's satisfaction that the sources identified will be available to the developer within 9 months of the reservation of credit.

- For mixed income developments, an agreement with the municipality on the real estate tax assessment associated with the market rate units should include, at a minimum, an analysis of how the units will be assessed, the methodology for valuing the market rate units, the cap rate, if applicable, and the time frame associated with the tax assessment agreement.
- Documentation must be provided demonstrating that the municipality has agreed to limit taxes on the affordable units to 8% of the gross scheduled rental income for the real estate tax calculation or lesser percentage determined by the municipality.

3) Marketability: The development must have a reasonable likelihood that it will achieve sustainable occupancy of 95% within 6 months of construction completion. For mixed income proposals that meet the 20% at 50% or 40% at 60% set asides, the applicant must submit a third-party market study that includes an absorption schedule, lease-up reserve and identifies the timeline for achieving 95% occupancy. Marketability of all projects will be evaluated relative to the proposed locality of the development, target market population, rent levels and affordability, project design and amenities. Developers will be required to demonstrate marketability through such documentation as:

- Information on market comparables;
- Information on the supply and quality of the existing housing stock and rent burdens;
- Information on other planned development/revitalization activity in the area;
- Assessment of potential impact on the financial and operating viability of existing subsidized housing developments; local demographics (including income, age and any special needs characteristics); marketing and outreach strategies;
- Information demonstrating that the proposed location is appropriate for the target population in terms of environment, quality, proximity to services, and attractiveness of the site and its surroundings.

- Mixed use developments must provide the marketability information for both the residential and commercial components.

Developers are encouraged to set rents so that the proposed rents are affordable to residents in a given location and not simply set at the program's maximum rents. One aspect of a development's marketability is to have rents that are affordable and attractive to prospective tenants. Therefore, additional consideration will be given to projects that demonstrate that the proposed LIHTC rents are below those of comparable, unassisted units in the market.

- 4) Readiness to Proceed: Applicants must demonstrate that construction is reasonably likely to commence within 12 months of reservation of credits and be complete within 30 months of reservation. To receive and maintain a reservation of LIHTCs, all developers must demonstrate readiness to proceed throughout the pre-development process. An assessment of a proposal's initial readiness to proceed will be made based on the developer's ability to achieve the following within 9 months of an executed reservation letter for LIHTCs: (i) receive all written land use and zoning approvals and building permits; (ii) complete all regulatory, environmental, and historical reviews; (iii) maintenance of site control; (iv) secure all funding commitments; and (v) demonstrated financial feasibility.

Continued readiness to proceed will be determined by RIHousing, in its reasonable judgment, based on factors such as: (i) a developer's ability to meet the requirements to receive a Carryover Allocation Agreement ("CAA"); (ii) finalize and complete design development and contract drawings; (iii) secure an executed commitment letter with a LIHTC investor; (iv) demonstrate continued financial feasibility including, but not limited to, a signed schedule of values from a general contractor based on an approved set of plans and specifications; and (v) close on all financing and commence construction within 12 months of reservation for LIHTCs.

RIHousing will use its best professional judgment in evaluating an application for readiness to proceed. Staff will consider the developer's past performance in meeting permitting, funding and closing deadlines in projects of similar scope and size, and present their recommendations to the Funding Committee for a final award decision.

- 5) Total Development Cost Cap: The per unit total development cost ("TDC") of any project, regardless of which building type it is proposing, cannot exceed \$429,000 per unit not including capitalized reserves. Any

proposal exceeding the TDC cap, will be ineligible for an award of LIHTCs.

For projects proposing a hybrid transaction in which a developer seeks both an allocation of 9% LIHTC and a simultaneous financing plan seeking an allocation of tax exempt bonds and 4% Credits (a “Hybrid Development”), developers must conform their applications for both the 9% and 4% proposals to the RIHousing requirements for such transactions contained in Program Bulletin 2022-2 and Section 12 of the Developer’s Handbook.

RIHousing will require proposed Hybrid Developments to be of a scale necessary to produce demonstrable savings of resources in exchange for the higher complexity of the execution and to otherwise meet the requirements set forth in the Program Bulletin. In evaluating a proposed Hybrid Developments, RIHousing will consider, among other things: (i) the Applicant’s experience in successfully completing the proposed hybrid structure and organizational depth and capacity to undertake complex transactions, (ii) simultaneous financing for each tranche, and (iii) demonstrated cost savings and increased units as a result of a Hybrid Development.

For any project proposing market rate units (whether in a 9%, 4% or Hybrid transaction, the gap funding request (i.e. non-equity) must be used to primarily support the development of the affordable units, not the market rate units.

B. Scoring

Point Allocation Summary

20 25 points	TDC
20 points	LIHTC Efficiency
5 points	Leverages rental and operating subsidy such as: HUD’s Rental Assistance Demonstration program, Section 811 program, Federal or State Rental Assistance program.
10 Points	Leverages hard debt, Non-RI Housing or non-State Competitive Housing Resources such as FHLB funding or Federal and State Historic credits
6 Points	<u>The provision of 3+ bedroom units</u>
6 points	Serves very low-income, homeless and/or special needs persons
3 points	Rhode Island Construction Firms
8 points	Fully permitted development
26 points	Alignment with CCD goals

~~DRAFT~~

- 10 points Located in a community with less than 10% affordable homes
- 5 points Addresses vacant, foreclosed and blighted properties
- 3 points Energy Star & Tier II
- 3 points Passive Housing
- 3 points Renewable Energy
- 5 points Preservation of Greenfields

Total ~~127~~138 points

(15) Negative points if applicable

FINANCING POINTS (Up to 5566 points)

A. Up to 2025 points - TDC per residential unit based on construction type as defined below. If submitting a proposal with 2 types of construction, provide a breakout of TDC by type.

Projects will fall within six categories of building type and RIHousing has determined a maximum TDC (the “Overall TDC”) within each building type. **The maximum per unit Overall TDC can be found in the Program Bulletin included in the 2023 Developer’s Handbook.** The building types and Overall TDC are as follows:

Building Type	Maximum per unit Overall TDC
Urban (includes scattered site and urban in-fill)	Refer to Section 9 of the 2023 Developer’s Handbook
Historic Mill Conversion	
Suburban/Rural Cluster Subdivision (buildings contain less than 8 units per building)	
Garden style apartment up to 3 stories (no elevator)	
Up to 4 Story building with elevator	
4 or 5 Story Stick built on Podium Parking	

While the Overall TDC costs above are limits based on comparisons of previous RIHousing funded projects and RS Means, the scoring will be calculated on a weighted average (the “Weighted Average TDC”), based on bedroom size to ensure parity between projects that cater to different populations. Project applications will be evaluated for cost reasonableness using an index, which is the Weighted Average TDC per unit and the TDC per bedroom. For mixed-use projects, the Weighted Average TDC for only the residential portion of the project, including common areas, will be used for this calculation. Capitalized reserves will be excluded from the TDC calculation. The Weighted Average TDC will be calculated as follows:

$$([2 * \text{TDC/unit}] + [\text{TDC/\# of bedrooms}]) \text{ divided by } 3.$$

The Weighted Average TDC will be the basis for scoring the TDC per unit. TDC points will be based on \$5,000 increments. The calculations will be built into the proforma.

Proposals that include both new construction and preservation will require a Weighted Average TDC for both new construction and preservation. The 2 amounts will then be averaged for a final Weighted Average TDC.

Note: Efficiency apartments will count as a one-half bedroom in the Weighted Average TDC calculation.

Extraordinary Conditions:

Projects with extraordinary conditions that increase costs beyond the TDC caps should provide detailed back-up outlining the reasons for the higher costs. Acceptable extraordinary conditions are limited to the following:

1. Excessive environmental remediation defined in a remedial action work plan required by the either the Environmental Protection Agency, the RI Department of Environmental Management, or the Coastal Resources Management Council.
2. The demolition of non-contributing structures to facilitate the leveraging of historic LIHTCs.
3. The calculation of prevailing wages.
4. The installation of on-site water service and water treatment systems in rural locations.

If the applicant is seeking relief under one of these extraordinary conditions, they must provide itemized breakdowns of these costs prepared and attested to by a general contractor. These costs will be evaluated by RIHousing to ensure consistency with the industry and will then be deducted from the unweighted TDC before applying the Weighted Average as described above.

In order to ensure that applicants are submitting realistic pricing for their proposals, if allocated LIHTC, the first 10% of cost overruns above the preliminary budget, will be absorbed by a like reduction in paid developer fee before any additional LIHTC or soft funds will be allocated to the project.

B. Up to 20 points - LIHTCs per residential unit. Applications with more than \$30,000 per credit per unit will receive 0 points. The points will increase by 1 for every \$1,000 below the maximum.

Weighted Avg units: $([2 * \# \text{ of bedrooms}] + [1 * \# \text{ of units}]) \text{ divided by } 3$

The product, the Weighted Average Credit per Unit, will be the basis for scoring the LIHTC per unit. LIHTC per unit points will be based on \$1,000 increments. The calculations will be built into the proforma.

Note: Efficiency apartments will count as one-half bedroom in the Weighted Average calculation.

C. Up to 5 points for leveraging committed state and federal funds from rental and operating subsidy programs such as a Project Based Section 8 rental contract, HPF-ELI operating subsidy or other similar federal and state program.

20% or more units in the development	5 points
10-19% of units in the development	3 points
up to 9% of units in the development	0 points

D. Up to 10 points – Leveraging of (i) hard debt, or (ii) non-RIHousing or non-State competitive housing resources (e.g., USDA funding, Municipal, Federal and/or State Historic Credits, Rebuild Tax Credits, FHLB, private grants, etc.). Less than \$20,000 per unit will receive 0 points. The points will increase for every \$1,000 above the minimum.

≥\$60,000 per unit	10
≥\$50,000 per unit	8
≥\$40,000 per unit	6
≥\$30,000 per unit	4
≥\$20,000 per unit	2

≥ \$30,000	10 points
≤ \$20,000	0 points

E. Up to 6 points – The creation of three bedroom or larger units

% 3-bedroom units of overall unit count	Bonus Points
10%	2
20%	4
30%	6

No points will be awarded for projects with less than 10% of the overall units being 3+ bedrooms.

GENERAL POINTS (up to 1917 points)

- A. Up to 6 points for effectively serving people: (i) who have income at or below 30% of median income, (ii) are homeless and coming from the Coordinated Entry List or (iii) have special needs.

For developments in which the owner **will** be partnering with a service provider to provide supportive services:

- 6 points – 21% or greater of the total number of units in the development
- 4 points – 11- 20% of the total number of units in the development
- 2 points – up to 10% of the total number of units in the development

A service plan and memorandum of understanding with a service provider is required for homes that are intended for persons with special needs.

For developments in which no supportive services will be provided:

- 3 points – 21% or greater of the total number of units in the development
- 2 points – 11- 20% of the total number of units in the development
- 1 point – up to 10% of the total number of units in the development

- B. Up to 3 points for utilizing Rhode Island based firms.

- 3 points for an applicant that certifies in the application that up to 50% of the sub-contractor contracts will be awarded to Rhode Island based construction firms.

- C. Up to 8 points for a development that at the time of application has all applicable regulatory agency permits including: municipal permitting bodies (local planning, zoning and building permit approvals) and state regulatory agencies (Department of Environmental Management and Coastal Resources Management Council).

- 8 points for a fully permitted development that has building permits secured AND specifications are at least 90% complete AND architect confirms in writing that the plans and specifications can be 100% complete within 30 days AND the application includes a signed schedule of values from the general contractor, determined by RIHousing to be consistent with current pricing, that is the basis for the funding application.
- Up to 6 points for master, preliminary and final plan approval for a development or for a development with “by right” approval. Points will be prorated based on approvals in place at time of application.

Proposals that do not have zoning approval at the local level typically cannot meet the Readiness to Proceed Threshold Requirement. Applicants that cannot demonstrate zoning approval or the ability to build “by right” are discouraged from applying unless they can demonstrate they can secure approvals within 6 months of preliminary approval of a LIHTC award.

COMPREHENSIVE COMMUNITY DEVELOPMENT (Up to 26 points)

TRANSIT AND CONNECTIVITY		Points
Development receives a Walk Score measurement of 40-60 (1 point) or 60+ or higher (2 points)		Up to 2
Development provides interior bike storage for at least 1 bike per residential unit		1 point
Development ties into existing bike routes		1 point
RI adapted transit scoring system		Up to 2
• Development is within ½ mile of a bus stop	1 point	
• Development is within ¼ mile of a bus stop	2 points	
• Alternative transit options - other no or low-cost transportation services available to all residents which can be documented with a letter or agreement with the provider	.5 points	
AREAS OF OPPORTUNITY		
The statewide average HS graduation is 84%. See the 2022 KidsCount for reference (RIKCFactbook2022 (rikidscount.org))		Up to 2 points
• Communities with HS graduation rate equal to or greater than 92%	2	
• Communities with HS rates between 84% and 91.99%.	1	
• Communities with HS rates less than 84%	0	
Development has a mixed-use component that includes rental space for a commercial business(s) (which can be in a separate ownership structure such as a condominium). Commercial income must be reflected in the budget; additional point for spaces that create jobs for local		Up to 2 points

community members and/or service the local community.		
<ul style="list-style-type: none"> Includes commercial component (can be in basis if consistent with the Code) 	1	
<ul style="list-style-type: none"> Creates jobs for local community members and/or service the local community 	1	
Development will have a range of income levels and at least 15% of the units are considered unrestricted (under LIHTC) units.		Up to 3 points
15% of the units are market rate	1	
Up to 20% of the units are market rate	2	
More than 30% of the units are market rate	3	
Development is designed using Crime Prevention Through Environmental Design (CPTED). Please see www.planning.org/pas/quicknotes/open/pdf/Qn42.pdf for the key principles of CPTED. Please note which principles have been incorporated		1
ENGAGEMENT AND SERVICES		
Developer is a community-based nonprofit that has a demonstrable track record of community engagement, is incorporated in the state of RI, has IRS 501(c)3 status and has operated housing in the neighborhood or similar neighborhoods in the state. The qualifying non-profit developer may be part of a joint venture if they own at least 50% of the general partner interest of the borrower entity.		3
Developer has participated in a public engagement process that includes community meetings and community input beyond those held for the locally mandated approval process (must be documented), and the process was conducted within 12 months of the date of application for LIHTC.		1
Proposal is in a QCT and/or there is a Concerted Community Revitalization Plan that meets the criteria outlined in the Federal Criteria section of the Allocation Plan		1
Development certifies compliance with the Affordable Connectivity Program included in the 2021 Federal Infrastructure Bill.		Up to 3 points
<ul style="list-style-type: none"> Qualified Tenants (income at or below 200% of the federal poverty level("FPL")) must pay \$9.99/month 		2

(or required minimum per program) and the property owner coordinates \$30/month subsidy for 100 megabit per second, or higher speed, service from the service provider.		
<ul style="list-style-type: none"> Alternatively, for income eligible residents with incomes above 200% of the FPL but less than 60% of AMI, Development provides 100 megabit per second, or higher speed, service at a cost to the resident of no more than \$9.99/month. 		3
<p>For the alternative metric above (residents over 200% of FPL) the cost for broadband provision must be reflected in the proforma operating budget, and cost itemized for review. The application must include a written proposal for the provision of the infrastructure that supports the proposed broadband service.</p> <p>At a minimum, the applicant must commit to providing the service for 15 years from the last placed in service date.</p>		
<p>Development incorporates the space and/or provides supportive services to residents based on the list of prioritized services outlined in the Prioritized Supportive Services Table below.</p> <p>Qualifying Standards:</p> <ul style="list-style-type: none"> MOU between applicant and provider included in application, outlines costs and includes a narrative describing services to be provided. Minimum of 24 hours per year of services to be provided, outcomes and attendance to be tracked. Services must be free to all income and/or age qualified residents. Transportation, where applicable, provided at no cost Residents must be made aware of all services available 		Up to 4 Points

Prioritized Supportive Services Table		
2 Points	1 Point	0.5 Points
Childcare	Tutoring / College Planning	Art / Music / Writing Classes
Adult daycare	Employment Services	Nutrition Classes
Job Training	Resume Building Classes	Sports / Exercise classes
GED / Continuing Education	Medicaid Waiver Assistance	Movie nights
Behavioral Health Counseling	YMCA collaboration	Resident Meetings
Case Management for Permanent Supportive Housing		
This list is not meant to be exhaustive. If you intend to provide additional services, please outline in your narrative and estimate the eligible points		

COMMUNITY (up to 15 points)

- A. 10 points – A proposed development which is located within a community with less than 10% affordable housing as defined by state law; **OR**

5 points - A proposed development in an exempt community with less than 10% affordable housing as defined by state law. Refer to the Developer's Handbook for the current list of eligible communities; **OR**

5 points – A development in an exempt community which provides 0%-60% AMI units in a census tract with an average AMI that exceeds 100% of AMI for that municipality.

- B. Up to 5 points – A development that includes rehabilitation of vacant, foreclosed and/or blighted properties OR infill development on vacant neighborhood lots. An infill lot is defined as a lot in an established and developed neighborhood and development serves to integrate the streetscape and fabric of the neighborhood. A unit must be non-habitable, be designated blighted by the municipality within which it is located, or have failed an HQS inspection to be considered blighted.

- 5 points: 100% of the total number of units in the development
- 4 points: 80-99% of the total number of units in the development
- 3 points: 60-79% of the total number of units in the development
- 2 points: 40-59% of the total number of units in the development
- 1 point: 25 -39% of the total number of units in the development

EFFICIENCY (Up to 14 points)

Rhode Island Residential New Construction (“RNC”) Tier I standards under National Grid’s (“NGRID”) program guidelines are the baseline requirement of RI Housing’s current design and construction guidelines. These standards are slightly more stringent than the current R.I. State Energy Conservation Code Standards. Additional points may be awarded for exceeding the Tier 1 standards as set forth below:

- A. Up to 3 points may be awarded to new construction developments that achieve NGRID’s RNC Tier II **AND** Energy Star 3.1 revision 8 standards (or most current standards at time of application) to obtain a higher level of documented energy efficiency. The additional standards should be specifically itemized for review otherwise no points will be awarded; OR

Projects undertaking substantial rehabilitation rather than new construction will be awarded up to 3 points if they demonstrate an ability to achieve NGRID’s RNC Tier II standards. The additional standards should be specifically itemized for review otherwise no points will be awarded: OR

For Historic Mill rehabilitation projects, 1 point will be awarded to projects that achieve Level 1 under the NGRID Rhode Island Adaptive Reuse Program and 2 points if they achieve Level 2 under this same program.

- B. Up to 3 additional points may be awarded to projects that achieve RNC Tier III **AND** meet the State’s most current Net Zero or Passive House standards.

- <https://www.phius.org/home-page> PHIUS
- <https://www.energy.gov/eere/buildings/zero-energy-ready-homes> ZERO Energy Ready Home
- <http://www.energy.ri.gov/policies-programs/lead-by-example/rhode-island-stretch-codes.php> Rhode Island Stretch Code
- https://www.nationalgridus.com/media/pdfs/resi-ways-to-save/ee6174_ri_newconsprogram.pdf

- C. Up to 3 points may be awarded to those developments that incorporate Photo Voltaic solar panels (“PV”) or other renewables including net metering (as defined in R.I.G.L. Chapter 39-26-5). Developments will receive points as follows:

- 1 point if the proposed PV array system or other renewable energy system(s) is/are large enough to cover no less than 50% of the

project's annual common area and site electric load as calculated by a qualified engineer

- 2 points if the proposed PV array system or other renewable energy system(s) is/are large enough to cover no less than 100% of the project's annual common area and site electric load as calculated by a qualified engineer.
- 3 points if a Development incorporates a PV array or other renewable energy systems that are sufficiently sized to create a net-zero development based on the overall plans and specifications for the property.

D. 5 points for a development that does not involve destruction of fields, forests, agricultural lands or environmentally sensitive land, and/or includes a cluster development in which more than 50% of the land is conserved.

NEGATIVE POINTS (assessed by RIHousing based on borrower's inability to perform under a previous allocation of LIHTCs).

- Negative 5 points for having a higher TDC per unit at the closing of the developer's previous LIHTC transaction that would have resulted in lower points at the time the proposal was initially scored; provided however, that if the developer has secured additional non-RIHousing and non-State gap funding to offset the cost, no penalty will be assessed.
- Negative 5 points for higher LIHTCs per unit at the closing of the developer's previous LIHTC transaction that would have resulted in lower points at the time the proposal was initially scored.
- Negative 5 points for developer not closing their previous LIHTC transaction within 12 months of preliminary approval. Exceptions may be made for circumstances that, in RIHousing's sole determination, were outside the developer's control.

At a minimum an applicant subject to a negative point assessment, must submit an application that meets threshold and results in a score that is equal to or higher than the lowest scoring application in the funding round.

C. Scoring Assessment Criteria

Borrowers should note the assessment scoring criteria, requirements and guidance that are applicable to the selection of proposals.

1. Financial Analysis:

- a) TDC: Development and construction costs will be reviewed for adequacy and reasonableness in accordance with the guidelines established in the RIHousing Developers Handbook. Staff will consider the documentation submitted in support of the proposed costs, sources and uses; the development team's past performance in achieving the costs set forth in prior applications for funding and prior projects; and RIHousing's own expertise and experience with housing developments.
- b) Management Plan/Operating Budget: Operating budgets will be reviewed to determine adequacy and reasonableness of each expense line item, including but not limited to management fees, maintenance and administrative costs, replacement reserves, taxes, insurance, and costs of any planned tenant services. Proposed operating budgets will be compared to the applicant's own portfolio as well as similar type developments in the RIHousing portfolio. Proposed management agents and management plans will be reviewed to

determine the acceptability of planned procedures for managing the development's operations.

Existing portfolio performance is a key component of RIHousing's review. RIHousing staff will review the overall risk rating associated with each previously funded project in our portfolio to assess the strength of the owner and management agent, and their ability to address operating challenges over the life of the loan.

For service-enriched housing proposals, management plans will also be reviewed for demonstrated appropriateness and sufficiency of planned services for the target population, the inclusion of a cohesive, well-conceived and financially feasible service program, and the organizational capacity of the service provider(s) to deliver the proposed services.

2. Serving the Needs of Very Low-income Individuals and Families:

Rhode Island has adopted Open Doors Rhode Island which is a strategic plan to prevent and end homelessness. The plan can be accessed at: <http://ohcd.ri.gov/freq-requested/documents/openingdoorsri.pdf>. The goals of the plan are to end chronic homelessness in 5 years, end veteran's homelessness in 5 years and to end homelessness for families and youth in 10 years.

3. Rhode Island Based Firms:

To provide employment opportunities for the Rhode Island workforce, points will be given to borrowers that certify their general contractors will utilize Rhode Island based subcontractors.

a. Permitting:

There are substantial costs associated with permitting a development. However, significant delays in proceeding to construction can result from various local and state permitting processes. Recognizing the cost/benefit of fully permitting a development prior to the award of financing, RIHousing will provide a range of points for those developments that have received various permitting approvals.

b. Site Design:

The proposed site, including any existing improvements, must support the intended population in terms of desirability of location; environmental quality; adequacy of utilities and transportation; proximity and connections to jobs, civic, social, commercial, recreational, and services; and appropriateness of the proposed development to the specific site.

In addition, site conditions will be evaluated in terms of suitability for construction or rehabilitation. For new construction, ledge, wetlands, existence of subsurface contamination, grade, soil suitability, and base flood elevation (“Base Flood Elevation”) are typical considerations. For rehabilitation, existing structural conditions, ease or difficulty of adaptations, abatement of hazardous materials, appropriateness of existing buildings, layout and site plan for the proposed resident population will be considered.

As a general rule, developments will only be eligible for financing if the residential buildings are not constructed on land which is in a Base Flood Elevation (100-year flood) as determined by RIHousing in accordance with the most current flood insurance rate maps issued by the Federal Emergency Management Agency (“FEMA”); and comply with other applicable requirements of law, as they may be amended from time to time. RIHousing may consider granting a waiver to the Base Flood Elevation Requirement, if the Developer seeking to construct or rehabilitate a building in a Base Flood Elevation, can demonstrate to RIHousing's satisfaction that upon the occurrence of an event of the magnitude of the 100 year flood: (i) there will not be an unreasonable risk of bodily injury or harm to the residents; (ii) the ground floor units, building egress, site egress and parking areas are constructed above 100-year flood elevation; (iii) the structural integrity, systems and interior finishes of the building will not be materially and adversely affected; (iv) the building will remain functional; (v) the construction or renovation of the buildings will not result in increased flooding elsewhere and (vi) the property is covered by flood insurance in strict conformance with RIHousing’s insurance requirements.

In addition, all developments located in a 100-year flood plain will be required to provide a flood plain engineering report and, if necessary, an evacuation plan prepared by a qualified civil engineer or land surveyor. Developments which receive federal funding will also be required to meet HUD’s 8-Step floodplain standards. The decision of RIHousing shall be binding and conclusive.

4. Comprehensive Community Development:

a. **Transportation and Connectivity:**

Specifically identifying transportation and connectivity in the Plan prioritizes proximity and access to jobs, education, and civic, social, commercial, and recreational facilities. Walkable, mixed-use neighborhoods create physical foundations for a community. Ensuring that the development is close and accessible to transit, makes it transit-oriented. Consideration will be given to proposed developments where the Walk-Score information does not reflect recent changes to the area surrounding the proposed development.

b. Areas of Opportunity:

By emphasizing areas of opportunity, the Plan recognizes the goal of maximizing opportunities and services for residents. HUD considers area of opportunity as high opportunity neighborhoods that have a “positive effect on the economic mobility of residents”. The common indicators of an area of opportunity include low-poverty, educational and economic opportunity, and health care:

- Access to education – neighborhoods with access to hi-performing schools
- Economic Growth/Jobs - Access to jobs and/or low unemployment rates within a community
- Income Levels – high income levels and/or low poverty rates
- Access to Health Care – Hospitals, doctors and or health services are in close proximity to housing.

c. Engagement and Services:

This section recognizes the importance of ensuring that the community within which a proposed development will be located, and the potential beneficiaries of that development are aware of the proposal throughout the predevelopment process, and where appropriate can provide active feedback. Equally critical is the assurance that residents have the services they need to succeed and thrive. The Plan seeks to incentivize the provision of access to broadband and services such as childcare, job training and health counseling that prioritize educational, health and economic benefits for residents.

5. Geographic Diversity:

To further the goal of affordable housing across the state and in furtherance of HUD’s recognition of Areas of Opportunity, points for geographic diversity will be awarded under one of 3 possible categories:

1. In an effort to provide affordable homes in every community in Rhode Island and to assist communities that have been unable to reach a 10% affordable housing goal, 10 points will be given to developments creating new affordable units located in areas with less than 10% existing affordable housing.
2. Exempt communities with less than 10% affordable housing will be given 5 points.
3. The development of housing in census tracts in exempt communities with an average AMI that exceeds 100% of AMI will be given 5 points.

Applicants must demonstrate the need and demand for the housing proposed in the application.

6. Vacant, Foreclosed and Blighted Properties and Infill Lots:

Vacant, blighted and abandoned properties have a negative impact on our neighborhoods and communities.

- A unit must be non-habitable or have failed an HQS inspection to be considered blighted.
- An infill lot is defined as a lot in an established and developed neighborhood regardless of whether it had been plotted or not.

Applicants must demonstrate how the proposed housing contributes to an overall plan to revitalize and/or stabilize the neighborhood or that builds upon previous investments.

7. Efficiency:

RIHousing strives to ensure that developments are as energy efficient as possible and to the extent financially feasible, incorporate many of the industry's current green building practices. Points will be awarded to new construction developments that achieve NGRID's RNC Tier II and Energy Star 3.1 revision 8 standards to obtain a higher level of documented energy efficiency. The additional standards should be itemized for review.

Projects undertaking substantial rehabilitation rather than new construction will be eligible for partial points if they can achieve Tier II of standards under NGrid's program guidelines.

Additional points may be awarded to projects that achieve RNC Tier III **AND** meet the State's most current Net Zero or Passive House standards.

RIHousing has been working with NGRID and the Office of Energy Resources to develop strategies for improving energy efficiency in existing and new affordable housing, and to incentivize the use of renewable resources. The recent change in legislation to allow Virtual Net Metering in affordable housing is an additional opportunity to leverage these resources. See Chapter 26.4 of Title 39 of the General Laws of Rhode Island ("RIGL"), entitled "Net Metering" and more specifically "Community Remote Net Metering" as defined at RIGL Sec. 39-26.4-2(1).

Points will be awarded for developments that include PV or other renewable energy sources with enough capacity to offset a determined amount of annual operating costs.

8. Preservation of Greenfields:

In recognition of the need to preserve Rhode Island's diverse natural resources, RIHousing has placed high priority on protection of our working farmlands and forested areas. Points will be provided for a proposal that does not involve destruction of fields, forests, agricultural and other environmentally sensitive land and/or includes a cluster development in which more than 50% of the land is conserved.

D. Non-Profit Set-Aside, 9% Credits

Pursuant to IRC Section 42(h)(5)(B), RIHousing will set-aside a minimum of ten percent (10%) of the total LIHTC allocation, as required by IRC Section 42(h)(5)(B), for non-profit organizations that materially participate in the development and management of the project throughout the compliance period. The allocation of this set-aside to qualified non-profits will be determined by RIHousing in its sole discretion. These credits will be administered in the same manner as LIHTCs allocated to for-profit developers.

In order to qualify for credits from the non-profit set-aside, organizations must certify that they are a qualified non-profit organization and any substitute owner during the compliance period must continue to qualify under that set-aside. The term "qualified non-profit organization" means any organization that is described in Section 501(c)(3) or (4), is exempt from tax under Section 501(a), and includes as one of its exempt purposes the fostering of low-income housing.

E. Assisted Living Program

LIHTCs from the state per capita allocation and those provided through tax-exempt bond financing are available to borrowers proposing assisted living developments, provided that the proposal identifies long term funding for essential services.

F. Supportive Housing

LIHTCs from the state per capita allocation and those provided through tax-exempt bond financing are also available to borrowers proposing permanent housing developments with supportive service options for residents. Critical to the evaluation of these proposals will be the availability and commitment of sustainable funding for the proposed services and operating or rental assistance to assure long-term feasibility.

LIHTC regulations prohibit sub-leasing of units to agencies. Owners should not enter into a master lease agreement with service providers. Tenants must execute a lease for a unit. A contract between the owner and service provider should be executed to ensure the provision of services for a tenant.

IV. TAX EXEMPT FINANCING WITH 4% CREDIT

Applications for tax exempt financing are currently received on a rolling basis. While proposals utilizing tax-exempt bond financing with 4% credits may not be required to participate in a competitive funding process, all development proposals must meet the requirements of the Allocation Plan and Developer's Handbook.

V. UNDERWRITING GUIDELINES

RIHousing guidelines for underwriting, general contractor fees, reserve requirements, developer's fees, and soft costs can be found in the RIHousing Developer's Handbook at <https://www.rihousing.com/developers-handbook/>. The costs associated with these guidelines must be incorporated into the TDC for all proposals requesting LIHTC from RIHousing. The guidelines may be amended from time to time through Program Bulletin.

VI. FEE STRUCTURE FOR LIHTC PROPOSALS

All LIHTC proposals, including those seeking credits from the State's allocated pool or in conjunction with tax-exempt bond financing, shall be assessed the following fees:

A. Application Fees:

LIHTC proposals will be assessed a \$1,500 non-refundable application fee, payable upon application submission.

B. Underwriting Fee:

RIHousing will charge an underwriting fee for the review of all 4% and 9% credit proposals

Up To \$1,000,000	\$20,000
Up To \$3,000,000	\$25,000
Greater than \$3,000,000	\$35,000

If RIHousing provides the first mortgage financing, these underwriting fees will be applied toward RIHousing's origination fees. However, the underwriting fee will be charged if RIHousing is not the permanent senior lender. A **minimum** combined

origination/underwriting fee of \$20,000 will be paid if the loan amount is less than \$1,000,000.

C. Allocation Fees:

Approved LIHTC proposals will be assessed the following LIHTC allocation fee, payable at closing:

For 9% LIHTC Developments: 0.5 % of the 10-year allocation amount

For 4% LIHTC Developments: 1.0 % of the 10-year allocation amount

VII. COMPLIANCE MONITORING

Please refer to RIHousing's compliance monitoring manual which was updated in 2021 (the "Compliance Manual") for detailed monitoring requirements.

<https://www.rihousing.com/wp-content/uploads/RIHousing-LIHTC-Manual-Revised-March-2021-highlighted.pdf>

The compliance monitoring procedure is adopted pursuant to IRC Section 42. RIHousing or its agent reserves the right to amend this procedure as may be necessary or appropriate to conform to applicable changes in IRC Section 42 or regulations. In addition, RIHousing or its agent may adopt further monitoring forms and procedures as part of its Compliance Manual or as otherwise deemed appropriate.

Upon project completion, owners are required to obtain an independent third-party audit of 100% of the initial qualifying tenant files. This audit cannot be performed by the investor. Documentation of such audit must be submitted to RIHousing along with the Initial Qualifying Tenant ("IQT") report, the 8609(s) and the Cost Certification. The IQT must list the initial qualifying households and must coincide with the initial Tenant Income Certifications on file. Owners and agents are also required to attend a welcome meeting with RIHousing Asset Management and Loan Servicing staff.

BORROWERS AND OWNERS ARE ADVISED THAT COMPLIANCE WITH THE REQUIREMENTS OF IRC SECTION 42 OF IS THE RESPONSIBILITY OF THE OWNER OF THE DEVELOPMENT. MONITORING OF THE DEVELOPMENT BY RIHOUSING OR ITS AGENT DOES NOT IN ANY MANNER AFFECT, MODIFY, OR SUBSTITUTE FOR THIS RESPONSIBILITY. MONITORING BY RIHOUSING OR ITS AGENT DOES NOT CONSTITUTE A DETERMINATION OF ANY KIND REGARDING THE DEVELOPMENT'S ELIGIBILITY FOR LIHTC UNDER IRC SECTION 42.

A. Recordkeeping and Record Retention

Recordkeeping: For each year in the compliance period, which is equal to 15 taxable years beginning in the first year the credit is taken, the owner shall maintain records for each building in the project showing the:

- 1) Total number of residential rental units in the building (including the number of bedrooms and the size in square feet of each residential rental unit).
- 2) Percentage of residential rental units in the building that are low-income units.
- 3) Rent charged on each residential rental unit in the building, supporting documentation, and the applicable utility allowance.
- 4) Number of occupants in each low-income unit.
- 5) Annual income certification of each eligible tenant.
- 6) Documentation to support each eligible tenant's income certification.
- 7) Student status of all household members.
- 8) Waiting Lists and marketing/advertising information.
- 9) Unit vacancies in each building and information that shows when, and to whom, the next available units were rented.
- 10) Eligible basis and qualified basis of the building at the end of the first year of the credit period.
- 11) Character and use of the non-residential portion of any building included in the building's eligible basis that are resident facilities available on a comparable basis to all residents and for which no separate fee is charged for use of the facilities (or facilities otherwise reasonably required by the development).

Record Retention: The owner shall retain records relative to the first year of the credit period for at least 6 years beyond the due date (with extensions) for filing the tax return for the last year of the compliance period of the building. The owner shall retain the records described above for all subsequent years in the compliance period for at least 6 years after the due date (with extensions) for filing the federal income tax return for that year.

Additionally, for each year that any Agreements remain in effect after the compliance period, the owner shall retain records adequate to demonstrate compliance with the terms and conditions of the Agreement, including, but not necessarily limited to, income of tenants and rents charged at the development. The owner shall retain the records pertaining to a particular year for at least 6 years following the close of that year.

B. Certifications and Reporting

Annual Certification: The owner of every project that has received LIHTCs must submit to RIHousing by January 31st of each year during the compliance period and the extended use period an owner's Annual Certification of Continuing Program Compliance and evidence of Certification of LIHTC Training. As required under Treasury Revenue Regulation 1.42-5, the owner shall certify to RIHousing under the penalty of perjury, whether for the preceding 12-month period:

- 1) The project was continually in compliance with the terms and conditions of its Agreements with RIHousing.
- 2) The project met either (i) the 20-50 test under IRC Section 42(g)(1)(A), (ii) the 40-60 test under IRC Section 42(g)(1)(B) or (iii) the average income test, whichever minimum set-aside test was applicable to the project.
- 3) There was any change in the applicable fraction as defined by IRC Section 42(c)(1)(B) of any building in the project, and if there was a change, a description of that change.
- 4) The owner has received an annual income certification from each low-income tenant, and documentation to support that certification.
- 5) Each low-income unit in the project was rent restricted under IRC Section 42(g)(2).
- 6) All units in the project were for use by the general public (as defined in Treasury Regulation 1.42-9), including the requirement that no finding of discrimination under the Fair Housing Act, 42 U.S.C. 3601, et seq., occurred in the project.
- 7) Each building in the project was suitable for occupancy, taking into account local health, safety and building codes.
- 8) There was no change in the eligible basis (as defined in IRC Section 42(d)) of any building in the project, or there was a change, and information regarding the nature of that change.
- 9) All tenant facilities included in the eligible basis under IRC Section 42(d) of any building in the project were provided on a comparable basis without charge to all tenants in the building.
- 10) If a low-income unit in a building becomes vacant during the year, reasonable attempts were made to rent that unit or the next available unit of comparable or smaller size to tenants having a qualifying income before any unit in the building was or will be rented to tenants not having a qualifying income.
- 11) If the income of the tenant of a low-income unit in a building increases above the limit allowed in IRC Section 42(g)(2)(D)(ii), the next available

unit of comparable or smaller size in the building was or will be rented to tenants having a qualifying income.

- 12) An extended low-income housing commitment as described in IRC Section 42(h)(6) was in effect (for buildings subject to Section 7108(c) of the Omnibus Budget Reconciliation Act of 1989).
- 13) All low-income units in the project were used on a non-transient basis except for permanent supportive housing for the homeless provided under IRC Section 42(i)(3)(B)(iii) or single room occupancy units rented on a month-to-month basis under IRC Section 42(i)(3)(B)(iv).
- 14) The project was continually in compliance with the Violence Against Women Reauthorization Act of 2013, as amended, and all applicable implementing regulations.

Additional Reporting as Required: The owners of all LIHTC projects will also be required to submit to RIHousing information on tenant income, occupancy, and rent for each low-income unit, in the form and manner designated by RIHousing. RIHousing reserves the right to require owners of all low-income projects to submit additional information as it deems necessary.

The HERA included a provision directing state HFAs to collect and submit to HUD demographic and economic information on tenants living in LIHTC properties, including LIHTC projects in the extended use period. RIHousing requires owners/agents to upload and report tenant data monthly utilizing the RIHousing's online reporting system which allows property managers to enter tenant information directly into a web-based compliance reporting system. The information is immediately uploaded to RIHousing's online reporting system and is then transmitted directly to HUD.

C. Records Review

In accordance with Section 26 CFR 1.42-5(c)(2)(ii), all projects will be monitored for compliance by the end of the second calendar year following the year the last building in the project is placed in service. Subsequently, IRS regulations require that at least once every 3 years, state agencies conduct on-site inspections of all buildings in the project. These inspections will include a sample size in accordance with IRS guidance of the project's low-income units and review the certifications and supporting documentation along with the rent records for all the tenants living in the units. Properties directly financed by RIHousing and/or monitored under other federal or state programs administered by RIHousing will be reviewed annually. Additionally, LIHTC projects whose operations do not meet RIHousing's financial and operating management standards may be subject to more frequent examinations.

RIHousing reserves the right to perform a records review of any low-income housing project at least through the end of the compliance period and for any

additional term, as defined in the RIHousing extended use compliance monitoring policy.

D. Inspection

RIHousing may conduct annual physical property and unit inspections, as well as tenant file reviews, on all of the LIHTC developments monitored by RIHousing. RIHousing will randomly select the low-income units to be inspected in each development. The number of units to be inspected will be a sample size in accordance with IRS guidance.

Inspections of buildings, grounds and LIHTC units will be conducted using HUDs Uniform Physical Conditions Standards (“UPCS”) protocol.

RIHousing retains the right to perform an on-site inspection of any low-income housing project at least through the end of the compliance period and for an additional term, as defined in the RIHousing extended use compliance monitoring policy.

E. Notification of Non-Compliance

RIHousing defers to the Guide for Completing Form 8823 Low-Income Housing Credit Agencies Report of Noncompliance or Building Disposition (the “Guide”) to evaluate non-compliance findings. The scope of the Guide is limited to guidelines for preparing Form 8823 for submission to the IRS. Taxpayers are responsible for evaluating the tax consequences of noncompliance with IRC Section 42. The Guide is available on the IRS website at: <https://www.irs.gov/pub/irs-utl/lihc-form8823guide.pdf>

RIHousing will look to the Guide in evaluating compliance with IRC Section 42 and in determining whether a notice of noncompliance should be issued. As outlined in IRC Section 42(m)(1)(B)(iii), RIHousing or its agent has the responsibility to notify the IRS of non-compliance with the LIHTC provisions by completing Form 8823 “Low-Income Housing Credit Agency Report of Non-Compliance.” In the event that RIHousing or its agent learns of an event of non-compliance, it will send a letter to the project’s owner describing the condition and, where appropriate, recommending actions to correct the problem. The agency shall retain records of non-compliance or failure to certify in accordance with Treasury regulations.

The development shall have 30 days from the date of the notice to correct and supply proof that the noncompliance has been corrected (e.g., copies of income certifications/lease/rent rebate, etc.).

If RIHousing determines that the clarification from the owner on the noncompliance issue establishes that the owner was always in compliance, then no Form 8823 is issued, and the owner is notified within 5 business days.

If RIHousing determines that there was noncompliance and the issue is now remedied, then Form 8823 will be filed with the IRS and the owner will be notified no later than 45 days after the end of the time allowed to the owner to take remedial action.

G. Casualty Loss

Unfortunately, disasters or accidents sometimes damage or destroy LIHTC units or properties. When these occur, it is the responsibility of the owner/agent to report the loss to RIHousing as soon as possible after an incident that results in a unit or building going off-line. Furthermore, the owner must submit a plan to RIHousing that sets a timeframe for restoration of the lost buildings or units.

Casualty loss that is not part of a presidentially declared disaster invokes no recapture if the loss is returned to a good condition within a reasonable period. This period is no more than 24 months after the end of *the year* that loss occurred. However, credits cannot be claimed while the unit(s) or building(s) are offline. For presidentially declared disasters, both recaptured and disallowance of credits are avoided if the loss is restored in a *reasonable period*. In the case of a declared disaster, the maximum reasonable period is 25 months *after the month* that a disaster is declared. For either type of casualty loss, RIHousing may impose a lesser reasonable period based on specific details as to the severity of loss.

For LIHTC projects, RIHousing must report the loss and restoration to the IRS. If the units have not been fully restored, RIHousing will submit a copy of the owner's plan and timeframe for replacement along with an uncorrected Form 8823 to the IRS. Once all units have been restored and are available for occupancy, RIHousing will issue a corrected Form 8823 to show the units are back in compliance.

If an owner fails to report a casualty loss to RIHousing promptly, RIHousing will report the incident as noncompliance to the IRS using Form 8823 as soon as compliance staff becomes aware that a loss event occurred.

Displaced Persons. For a period after a presidentially declared disaster, LIHTC properties across the nation may house persons displaced by the disaster *regardless of their income*. RIHousing will issue bulletins following specific disasters, along with directions and how long the temporary allowance to house disaster victims will last.

H. Liability of the Owner

Compliance with the requirements of IRC Section 42 is the responsibility of the owner of the building for which the credit is allowable. RIHousing's obligation to

monitor for compliance with the requirements of IRC Section 42 does not make it responsible for the owner's noncompliance.

I. Annual Compliance Training

During the 15-year compliance period, the owner must certify that at least one member of the on-site management staff attended annual training specific to the LIHTC program and provided by a 3rd party vendor, or, with prior written approval of RIHousing, by the management company's in-house compliance department. A copy of the training certifications must be submitted to RIHousing by January 31st of each year.

VIII. EVENTS OF RECAPTURE

A full recapture of credits occurs if the building fails to meet the minimum set-aside requirement. A partial recapture of credits occurs if the building's low-income occupancy percentage decreases, but not below the minimum set-aside level, and/or if eligible basis decreases. The potential effect of non-compliance is to increase taxes in the year of non-compliance based on all previous years that the credit was earned. The excess of the credit actually earned each year over the credits that would be allowed if the credits were claimed ratably over the fifteen-year compliance period (the accelerated portion of the credit) plus interest is recaptured. In this event, IRS Form 8611 "Recapture of Low-Income Housing Credit" must be filed by the project's owner and retained for 3 years following the Compliance Period.

It is important to note that there are additional items that trigger recapture. Please refer to IRC Section 42 and the RIHousing website for important Program Bulletins and Notices regarding changes/revisions to policies.

IX. COMPLIANCE MONITORING FEES

A. Compliance Monitoring Fees:

In order to offset the cost of compliance monitoring, a low-income housing unit fee will be assessed to all LIHTC developments per LIHTC unit. This fee will be due and payable no later than March 31st of each year. This fee will be reviewed on an annual basis and may be increased to cover administrative costs at RIHousing's discretion. In accordance with the RIHousing Extended Use Compliance Monitoring Policy, fees will be assessed through the term of the Extended Use Period. RIHousing reserves the right to increase compliance monitoring fees for Owners who elect income averaging.

X MISCELLANEOUS

RIHousing recommends that owners/agents stay current with updated information by logging into our website at <https://www.rihousing.com/> and viewing and downloading important information outlined in our Program Bulletins and Notices.

XI. APPROVAL OF THE GOVERNOR

I, Daniel J. McKee, Governor of the State of Rhode Island, do hereby signify my approval of this 2023 LIHTC Qualified Allocation Plan for the distribution of federal LIHTCs in this State, in conformance with IRC Section 42.

Signed: _____
Daniel J. McKee, Governor

**State of Rhode Island
2023 Qualified Allocation Plan
For the Low-Income Housing Tax Credit (“LIHTC”) Program**

INTRODUCTION

RIHousing has been designated the responsibility for administering the federal Low-Income Housing Tax Credit (“LIHTC”) Program (the “LIHTC Program”) for the State of Rhode Island (“the State”). Federal law requires that a Qualified Allocation Plan (the “Allocation Plan”) outlining the process for the allocation of LIHTCs be presented to the public through a hearing for review and comment. For the Governor to approve and execute, the final Allocation Plan must include input from the public hearing and comment period, as well as all available housing needs data.

RIHousing has developed this Allocation Plan to comply with the requirements of Section 42 (“IRC Section 42”) of the Internal Revenue Code (the “Code”) and to ensure that those developments receiving LIHTCs produce or preserve housing addressing the most pressing needs of the State. This Allocation Plan establishes the priorities that the LIHTC Program will address from among those needs and incorporates those priorities into the criteria used to evaluate all proposals. This Allocation Plan will cover the 2023 allocation year for 9% and 4% LIHTC in conjunction with tax-exempt financing that is subject to the private activity bond cap.

I. LIHTC PROGRAM SUMMARY AND REQUIREMENTS

A. Overview

There are three types of credits available to developers of affordable rental housing. The first type of credit is a 9% annual credit for the costs of new construction or substantial rehabilitation of an existing building. The second type of credit is a 4% annual credit for the cost of acquiring an existing building that involves substantial rehabilitation. Both the 9% and this 4% credit are part of the state’s annual per capita allocation. The third type of credit is also a 4% annual credit for the costs of new construction or substantial rehabilitation, including acquisition, of an existing building and is made available through the issuance of tax-exempt bonds.

For further information and detailed requirements relating to the different credit types and methods of calculating the credit, refer to IRC Section 42.

B. Rhode Island Annual LIHTC Allocation Pool

Each state is awarded a limited amount of 9% LIHTCs annually. Rhode Island will receive the small state minimum or approximately \$3,000,000 for 2023, indexed

for inflation. The pool of LIHTCs may be greater in any year if the allocation is modified by Congress, unused credits are carried forward or if previously allocated credits are returned or rescinded.

C. LIHTC Requirements

1. Federal Criteria

IRC Section 42(m)(1)(B)(ii)(III) requires that a preference for an allocation of credits must be given to developments serving the lowest income residents, developments which commit to the longest period of affordability, and developments located in a qualified census tract ("QCT"). Because placing LIHTC projects in a QCT risks exacerbating concentrations of poverty, the QCT preference will only be given when there is an added benefit to the neighborhood in the form of the project's contribution to a concerted community revitalization plan ("CCRP"), as outlined in Section III B. of the Allocation Plan, Scoring Criteria, under Comprehensive Community Development ("CCD").

A CCRP is a formal plan which may include but is not limited to (i) a description of the geographic scope of the community and provides a clear direction for implementation; (ii) demonstrates the need for revitalization; (iii) includes a strategy for obtaining commitments of public and private investment in non-housing infrastructure, amenities, or services beyond the development; and (iv) includes planning document elements such as demonstration of the need for revitalization, setting goals for outcomes, identifying barriers to implementation, establishing timelines and benchmarks, and identifying community partners.

A plan will not be considered a CCRP if RIHousing determines, in its sole discretion, that the plan focuses narrowly on a "single property," or that the plan was approved solely for the awarding of CCRP points.

The following 10 additional statutory requirements are included in the Allocation Plan: (i) project location, (ii) housing needs characteristics, (iii) project characteristics, (iv) sponsor characteristics, (v) tenant populations with special housing needs, (vi) public housing waitlists, (vii) tenant populations of individuals with children, (viii) projects intended for eventual tenant homeownership, (ix) energy efficiency of projects and (x) the historic nature of projects.

2. State Criteria

The State of Rhode Island Consolidated Plan is developed jointly by RIHousing and the state's Office of Housing and Community Development. The state completed the 2020-2024 Consolidated Plan in

the spring of 2020, which sets the proposed priorities and goals for housing and community development programs for the next 5 years. Among the goals are the need to develop and maintain affordable housing including housing for elders, end homelessness, address healthy housing concerns, invest in non-housing community development, provide tenant-based rental assistance and to affirmatively further fair housing. Each year, the state submits an action plan to the U.S. Department of Housing and Urban Development (“HUD”) restating its goals and makes adjustments to estimated spending and output.

Statewide Planning has developed the Rhode Island Land Use 2025 Plan (the “2025 Plan”) which encourages the development of designated growth centers. The 2025 Plan is located at http://www.planning.ri.gov/documents/121/lu_exec.pdf. These growth centers and development areas envision a mix of commercial and residential uses with access to services, transportation and adequate water and wastewater infrastructure. In addition, all municipalities in Rhode Island have developed affordable housing plans which identify development opportunities within these communities.

3. Housing Needs

The State faces an overall shortage of quality, affordable, safe and healthy rental homes. According to the National Low-Income Housing Coalition’s 2020 Out of Reach Report, based on the most recent census data, Rhode Island has the 19th highest gap between what renters earn and what it costs to rent a two-bedroom apartment.

Much of the State suffers from a continually aging housing stock, a significant portion of which is characterized by severe or moderate physical problems such as lead-based paint hazards.

The redevelopment of properties that are in foreclosure and those that are abandoned and vacant are a priority for RIHousing financing. Vacant and abandoned property erodes overall property values and causes deterioration in entire communities where prior investment has occurred. RIHousing is committed to using resources where they will most efficiently be used to stabilize neighborhoods.

To meet the state’s goal of at least 10% affordable housing in each community, the State must substantially increase its production. By concentrating state, federal and private resources to combine affordable housing with broader community development investments, neighborhoods can be revitalized. This approach encourages investment in Rhode Island’s urban areas and in new or existing growth or town centers and surrounding neighborhoods. This comprehensive approach to

development results in well planned developments that are sustainable and efficient.

D. Eligibility Requirements

Disclaimer:

To receive an allocation of LIHTCs, whether from the State's allocated pool or through the use of tax-exempt bond financing, a project must meet eligibility requirements under both the Allocation Plan and IRC Section 42. While many of these requirements are briefly summarized below, applicants should note that the federal rules governing LIHTCs are complex. All developers are advised to consult a qualified tax attorney and/or accountant to determine eligibility for the credit. In making this determination, qualified professionals are expected to be current and knowledgeable with all private letter rulings ("PLRs") and technical assistance memoranda ("TAMs") issued by the Internal Revenue Service ("IRS") which may provide insight to the IRS view regarding eligible basis determinations.

In allocating LIHTCs, RIHousing makes no representations to owners or other parties regarding compliance with IRC Section 42, Treasury regulations or other laws or regulations governing LIHTCs. Neither RIHousing nor its employees, agents, representatives, board members, or employees shall be liable for any matters arising out of, or in relation to, the allocation of LIHTCs.

1) Residential Rental Property

In order for a project to qualify as a low-income housing project, it must be residential property. The project must be: (1) used other than on a transient basis, (2) rented or available for rent on a continuous basis, (3) available to members of the general public, and (4) suitable for occupancy. Facilities providing continuous nursing, medical, or psychiatric care are not considered residential rental units for LIHTC purposes. Continual care, however, should not be confused with certain supportive services which can be provided. Examples of allowable incidental care include: (1) facilitating the making of medical appointments, (2) providing transportation to medical facilities, (3) providing basic first-aid skills in case of emergencies, and (4) assisted living.

2) Extended Use Period

IRC Section 42 requires that the low-income occupancy and rent restrictions be maintained during the initial compliance period of 15 years (IRC Section 42(i)(1)). In addition, the occupancy restrictions must be maintained for an extended use period of an additional 15 years per IRC Section 42(h)(6)(D). RIHousing requires the following:

- a. A Declaration of Land Use Restrictive Covenants ("Declaration") must be executed by the project owner. The Declaration must set forth an extended use period of affordability for the qualifying units of at least 30 years and an extended use period prohibition against evicting or terminating tenancy of existing tenants in low-income units other than for good cause.
- b. If a development is allocated LIHTC under the nonprofit set-aside, the owner (and any subsequent owner) during the compliance period must continue to qualify under that set-aside. The owner will indicate in the Declaration that they are electing to qualify under the nonprofit set-aside.
- c. For projects financed with tax-exempt bond proceeds, the required extended use period of affordability will be the greater of (i) the period that the tax-exempt bonds remain outstanding or (ii) 40 years.
- d. The owner must waive the right to seek termination of the Declaration by petitioning RIHousing to find a buyer of the development as provided in IRC Section 42(h)(6)(E)(i).
- e. In addition to the Declaration, RIHousing requires that a Regulatory Agreement be recorded prior to any lien documents and not be subject to termination in the event of foreclosure. The development owner may be required to have all lien holders of a development complete and sign a subordination to the Regulatory Agreement that will subordinate their liens to the provisions of the Regulatory Agreement.

3) Rent and Tenant Income Restriction

The project must meet certain tenant income and rent restrictions:

- a. Income Restrictions:

The Project must elect one of the following three Minimum Set-Asides:

at least 20 percent of the rental units in the project must be rent restricted for and occupied by households with incomes no higher than 50 percent of the Area Median Income ("AMI"), adjusted for family size.

OR

at least 40 percent of the rental units must be rent restricted and occupied by households with incomes no higher than 60 percent of the AMI, adjusted for family size.

OR

Under the Average Income Test, at least 40 percent of the units must be both rent-restricted and occupied by individuals whose incomes do not exceed the imputed income limitation designated by the taxpayer.

The average of the imputed income limitations designated cannot, according to IRC Section 42, exceed 60 percent of AMI, however, RIHousing is designating the maximum as 58 percent of AMI.

The designated imputed income limitations must be in 10 percent increments as designated in the Code.

b. Rent Restrictions:

The gross rent charged to a tenant, including utilities, cannot exceed 30% of the income limit for a qualified low-income household at 50% or 60% or, for Average Income Test elections, the applicable unit income/rent designation of AMI adjusted for family size, assuming 1.5 persons per bedroom. A table of qualified rents is located in the Developers Handbook and from HUD at <http://www.huduser.org/portal/datasets/mtsp.html> and from Novogradac at <http://www.novoco.com/products/rentincome.php>.

For more information on tenant income and rent restrictions, including rules for calculating rents, see IRC Section 42.

4) Least Amount of LIHTC Necessary for Project Feasibility

IRC Section 42 requires that RIHousing allocate credits in the minimum amount necessary for the financial feasibility of the project and its continued viability as a qualified low-income housing project throughout the credit period.

RIHousing must evaluate the amount of the credit at 3 specific times: (1) at the time of application, (2) at the time of reservation, and (3) at the time the building is placed-in-service and an IRS Form 8609 is issued. RIHousing will consider the proposal's distribution of the tax benefits between direct development costs, soft costs, fees, operating reserves and other costs and evaluate the need for LIHTCs to fill the gap after other financing sources

and subsidies have been taken into account. Developers will be required to certify the source and value of other subsidies and funding for the proposal.

5) Minimum Property Standards

Projects must meet state or local health or building codes or regulations. Corrections necessary to repair code violations must be specified in a rehabilitation work plan. The developer will be required to provide certification or to demonstrate to RIHousing that all code violations have been corrected upon construction completion. Compliance with health, safety and building codes is an ongoing obligation; non-compliance may result in penalties and/or recapture of credit.

6) Placed-In-Service Requirements

RIHousing will allocate credits only to projects which can be reasonably expected to become eligible for the credits in the year in which the Developer is to be awarded LIHTCs. This means that projects must either be able to be placed-in-service in that year or have incurred more than 10% of their reasonably anticipated project basis within 12 months of the reservation of LIHTCs. Placed-in-service generally refers to the issuance of the first certificate of occupancy for each building in the project.

7) Minimum Rehabilitation Requirements

IRC Section 42 requires that LIHTC projects meet minimum rehabilitation expenditure requirements. RIHousing requires a minimum rehabilitation expenditure of \$15,000 per unit.

8) Ten Year Placed In Service Restriction

To be eligible for the acquisition credit, buildings may not have been placed in service within the last 10 years. Generally, a transfer of the building results in a new placed-in-service date if, on the date of the transfer, the building is occupied or ready for occupancy. Exceptions may apply to certain property transfers and expiring use properties. In cases involving the purchase of a development that previously utilized LIHTCs for acquisition, the property may not be eligible for acquisition credit from the 2nd purchase until the completion of the initial 15-year compliance period.

9) Community Service Facilities

The portion of a residential building used as a community service facility may be eligible for the LIHTC Program. A community service facility is a

facility designed to primarily serve individuals whose income is 60% or less of AMI. Refer to Rev. Rul. 2003-77 for more information.

10) Market Study

Prior to closing, RIHousing requires that a comprehensive market study conforming to requirements consistent with standard industry practice be conducted as a condition of credit allocation analyzing the market area, including the depth and breadth of demand, comparable properties and rates, comparable operating expenses, market absorption rates as well as a study of the needs of the prospective population. For projects involving rehabilitation of existing and occupied properties with project-based rental assistance contracts, RIHousing, in its sole discretion, may modify the market study standards to reflect actual data available to RIHousing about the operation of the project and its market area. At the Developer's expense, the market study will be completed by a disinterested party commissioned by RIHousing. A market study acceptable to RIHousing, in its sole discretion, may also be commissioned by the development investor or third-party lender. For mixed-income proposals, a third-party market study will be required with the application for LIHTCs.

11) Native American Housing Assistance

Assistance provided under the Native American Housing Assistance and Self-Determination Act of 1996 ("NAHASDA") will not be taken into account in determining whether a building is federally subsidized for purposes of the LIHTC program. Therefore, such buildings will qualify for 9% credit as deeper targeting consistent with the rules for HOME-financed projects.

12) Homeownership Option

Developers electing to convert to homeownership at the end of the 15-year compliance period may do so under IRC Section 42. RIHousing will approve no more than 1 conversion application per calendar year. As these developments will be rental housing for a minimum of 15 years, they will be underwritten as a rental development and are subject to the same underwriting criteria set forth in the Developers' Handbook.

13) Public Housing Waiting Lists

Prior to occupancy, sponsors must commit in writing that they will provide written notice to the jurisdictional Public Housing Authority (or, where there is no local Public Housing Authority, RIHousing as the Section 8

Administrator for the State) committing to the acceptance of tenant-based vouchers.

14) Tenant Populations of Individuals with Children

Sponsors are encouraged to provide housing that provides opportunities to single parent and two-parent households with children.

E. HUD Qualified Census Tracts/Difficult-To-Develop Areas

Projects located in HUD's designated QCTs or difficult-to-develop areas ("DDAs") may be eligible for additional LIHTCs. DDAs are designated annually by HUD as updated income and fair market rent ("FMR") data become available. Generally, HUD publishes the list of QCTs and DDAs on an annual basis.

If an area is listed as a HUD designated QCT or DDA 1 year and is not listed on a subsequent list of designated areas, the designation is still effective if: (1) the allocation of credit to a borrower is made no later than the end of the 730-day period after the submission to the credit-allocating agency of a complete application by the borrower, and the submission is made before the effective date of the subsequent lists; or (2) for purposes of IRC Section 42(h)(4), the bonds are issued or the building is placed in service no later than the end of the 730-day period after the borrower submits a complete application to the bond-issuing agency, and the submission is made before the effective date of the subsequent lists, provided that both the issuance of the bonds and the placement in service of the building occur after the application is submitted.

The additional credits available to projects falling within the definitions of either or both of these categories are derived by increasing the project's eligible basis for the new construction or substantial rehabilitation portion of the project by up to 30%. The actual increase in basis is determined at the discretion of RIHousing pursuant to its analysis of the maximum amount of subsidy necessary to complete the project. The 30% increase is not available for the costs associated with the acquisition portion of any project.

Pursuant to H.R. 3221 Title I – Housing Tax Incentives, Rhode Island will prioritize projects that propose housing: (i) for special needs populations, (ii) for very low-income persons and families, (iii) for general occupancy units in "areas of opportunity" as defined by HUD or are otherwise proposed to be sited in areas of the state that will promote efforts to affirmatively further fair housing, and (iv) that is consistent with the RIHousing's CCD principles including the ability to collaborate, secure and leverage non-traditional resources to maximize financial feasibility for eligibility under the basis boost which is applicable to DDAs. Should RIHousing be given the authority, as the allocating agency, to designate properties funded with tax exempt bonds as DDAs, the same criteria shall apply.

F. HUD Subsidy Layering Guidelines

All projects submitted to RIHousing that may receive LIHTCs in combination with any form of HUD housing assistance will be subject to the subsidy layering review guidelines of Section 911 of the Housing and Community Development Act of 1992. These requirements are designed to ensure that participants in affordable multi-family housing developments do not receive excessive compensation by combining various HUD housing assistance with assistance from other federal, state, or local agencies. The guideline standards are divided into 3 categories: Builder's Profit, Developer's Fee, and Syndication Expenses, and are outlined in the Developer's Handbook. HUD has established safe harbor and ceiling standards for each of these categories. LIHTC agencies may perform the subsidy layering review function provided the agency certifies to HUD that it will properly apply the guidelines. RIHousing has assumed these responsibilities.

G. Single Room Occupancy Units

RIHousing no longer allocates LIHTC to the development of new Single Room Occupancy units.

H. Housing for the Homeless

The LIHTC has become a substantial resource for permanent supportive housing for the homeless. The portion of a building used to provide supportive services may be included in the qualified basis. Permanent supportive housing for the homeless must contain sleeping accommodations, and kitchen and bathroom facilities. Supportive services must be either: (a) located within the building or (b) be readily available to residents and well defined in a written supportive service plan outlining how residents will be connected to the services.

I. Handicapped Accessibility

LIHTC projects must comply with all applicable federal and state statutes and regulations regarding the operation of adaptable and accessible housing for the handicapped, including, but not limited to, Section 504 of the Rehabilitation Act of 1973, as amended ("Section 504") and the ADA Amendments Act of 2008, which amended Section 504.

J. Affirmative Action/Equal Employment Opportunity ("EEO")

RIHousing is committed to affirmative action and EEO. We have established minimum workforce utilization goals for Minority Business Enterprises and/or Women Business Enterprises ("MBE/WBE") and monitor construction projects for compliance with these goals. All developments receiving funding under the rental production program must use best efforts to: (a) award at least 10% of the

total construction contract dollar amount to minority and female owned businesses, and (b) ensure that at least 10% of labor hours for all trades are performed by minorities and/or women. Developers are encouraged to exceed the minimum goals set by RIHousing. Note that only those businesses included in the Rhode Island Department of Administration's Directory of Certified Minority and Women Business Enterprises will count towards the minority and women business and workforce utilization goals. Further note that for purposes of measuring these goals, RIHousing does not include persons of Portuguese descent as a recognized minority.

All developers receiving an allocation of credits from RIHousing must enter into an Affirmative Action Agreement detailing specific affirmative action goals and definitive, aggressive strategies and action steps to ensure that such goals are achieved.

K. Fair Housing Considerations

1. Siting and Marketing Consideration

In January 2017, Treasury issued regulations providing guidance on the implementation of Title VI of the 1964 Civil Rights Act, as amended (42 U.S.C. Section 2000d, et seq.) (hereinafter, "Title VI" and its regulations "the Title VI regulations"), as it applies to programs or activities receiving assistance from Treasury. Specifically, the Title VI regulations prohibit discrimination on the basis of race, color, or national origin in programs or activities receiving federal financial assistance from Treasury. See 31 CFR Part 22. Any proposal submitted for LIHTCs must comply with Title VI and Title VI regulations.

Under federal law, individuals seeking housing may not be discriminated against based on their race, color, religion, sex, ancestral origin, familial status or disability. State fair housing laws further extend protections against housing discrimination on the basis of marital status, sexual orientation, age, gender identity or expression, veteran status, and status as a victim of domestic abuse, or by reason of association with members of any of these protected classes.

In addition to prohibiting discrimination in housing due to membership in a protected class, the Title VI also imposes an obligation on recipients of federal housing assistance to administer programs in a way that affirmatively furthers fair housing. In its administration of the LIHTC Program, RIHousing is committed to encouraging the location of affordable homes throughout the state, particularly in geographic areas that have not reached the state affordable housing goal. RIHousing's scoring system provides incentives to achieve that result.

IRC Section 42(m)(1)(A)(ii) requires that each local jurisdiction have a "reasonable opportunity" to comment on any proposal to allocate LIHTCs to a project within

that jurisdiction. In accordance with Revenue Ruling 2016-29, IRC Section 42 ensures the opportunity for local input regarding the allocation decision but does not grant a local veto or authorize an allocating agency to abandon the responsibility to exercise its own judgment. RIHousing will notify the Chief Executive Officer, or the equivalent, of each jurisdiction in which a borrower has been selected to receive federal low-income LIHTCs to provide the jurisdiction with an opportunity to comment.

In addition, in order to ensure that all potentially eligible residents of RIHousing-financed developments have a fair opportunity to gain admission to those developments, RIHousing requires that sponsors employ an open and fair process that affirmatively furthers fair housing opportunities. To that end, all homes financed by RIHousing must be available to the general public, must be marketed pursuant to an approved affirmative fair housing marketing plan (“AFHMP”) and must be advertised on <http://www.housingsearchri.org>.

At a minimum, the AFHMP must include an analysis of those populations least likely to apply for housing in the area in which the development is located and a targeted marketing program to reach those populations. Such a program could include marketing in print or broadcast media targeted to such populations, outreach to organizations that serve those populations, and the like. In addition to the AFHMP, the housing must be distributed in accordance with an approved resident selection plan that is fair, open, and transparent. The resident selection plan must specify the process and timetable under which applications will be accepted, local preferences for admission, if any, the policy for initial selection of residents if the number of qualified applicants exceeds the housing available, and the waiting list policy.

The Violence Against Women Reauthorization Act of 2013, as amended, and its implementing regulations afford certain protections to victims of domestic violence, dating violence, sexual assault, and stalking, who apply for or reside in federally assisted housing, including housing financed with LIHTCs. RIHousing requires that sponsors incorporate these protections into lease forms, tenant selection plans, and resident policies relating to unit transfers and changes to family composition. On an annual basis, owners will be required to certify compliance with all applicable requirements of the Violence Against Women Reauthorization Act of 2013.

2. Limited English Proficiency (“LEP”)

A limited English proficiency (“LEP”) person is one who, as a result of national origin, does not speak English as their primary language and who has limited ability to speak, read, write, or understand English. To avoid national origin discrimination, in certain situations, Title VI requires assistance for persons who are LEP so that they can effectively participate in, or benefit from, federally assisted programs. Executive Order 13166, signed on August 11, 2000, directs all federal

agencies, including HUD, to work to ensure that programs receiving federal financial assistance provide meaningful access to LEP persons. All programs and operations of entities that receive financial assistance from the federal government, including but not limited to state agencies, local agencies and for-profit and non-profit entities, must comply with the Title VI requirements.

Federally assisted recipients are required to make reasonable efforts to provide language assistance to ensure meaningful access for LEP persons to the recipient's programs and activities. To do this, the recipient should: (1) conduct the four-factor analysis, (2) develop a language access plan ("LAP") and (3) provide appropriate language assistance.

The actions that the recipient may be expected to take to meet its LEP obligations depend upon the results of the four-factor analysis: (1) the services the recipient offers, (2) the community the recipient serves, (3) the resources the recipient possesses, and (4) the costs of various language service options. All organizations should ensure nondiscrimination by taking reasonable steps to ensure meaningful access for persons who are LEP. HUD recognizes that some projects' budgets and resources are constrained by contracts and agreements with HUD. These constraints may impose a material burden upon the projects. Where a HUD recipient can demonstrate such a material burden, HUD views this as a critical item in the consideration of costs in the four-factor analysis. However, refusing to serve LEP persons or not adequately serving or delaying services to LEP persons would violate Title VI. The recipient may, for example, have a contract with another organization to supply an interpreter when needed; use a telephone service line interpreter; or, if it would not impose an undue burden, or delay or deny meaningful access to the client, the recipient may seek the assistance of another agency in the same community with bilingual staff to help provide oral interpretation service.

Plans for assisting LEP persons should be included in the Tenant Selection Plan. For more information on LEP visit: <http://www.lep.gov>.

All developments receiving LIHTC will have to complete HUD form 935.2A to detail its AFHMP.

L One for One Replacement

Any proposal that contemplates the loss of existing deed restricted affordable homes must be accompanied with a plan outlining one-for-one replacement of the lost affordable rental homes. Proposed replacement units must be of comparable type and affordability.

M. Industry Recommended Standards

In evaluating and underwriting housing development proposals, RIHousing is guided by or generally follows industry recommended standards developed by the National Council of State Housing Agencies (“NCSHA”). Provisions of the “NCSHA Recommended Practices in Housing Credit Administration”, updated in December 2017, have been incorporated into the Allocation Plan and/or the RIHousing Developer’s Handbook.

N. Uniform Relocation Act

Developments financed under the rental production program are required to provide for uniform and equitable treatment of persons displaced from their homes and businesses and to establish and provide for uniform and equitable relocation of any residents or businesses.

O. Non-Profit Right of First Refusal

RIHousing is committed to the long-term affordability of developments for the benefit of tenants and full compliance by applicants and principals with the provisions of the IRC, the extended use agreement and other program requirements. RIHousing similarly has an interest in preserving the right of first refusal by a qualified nonprofit organization at the close of the compliance period, as authorized in § 42(i)(7) of the IRC.

RIHousing will therefore require the following with respect to all applications:

- a) Provisions to be included in the applicant's organizational documents limiting transfers of partnership or member interests or other actions detrimental to the continued provision of affordable housing;
- b) A designated form of right of first refusal document;
- c) Terms in the extended use agreement requiring notice and approval by the executive director of transfers of partnership or member interests;
- d) Debarment from the program of principals having demonstrated a history of conduct detrimental to long-term compliance with extended use agreements, whether in Rhode Island or another state, and the provision of LIHTC in general; and
- e) Provisions to implement any amendment to the IRC or implementation of any future federal or state legislation, regulations, or administrative guidance.

The decision whether to institute, and the terms of, any such requirements shall be made by the executive director as reasonably determined to be necessary or

appropriate to achieve the goals stated in this subsection and in the best interest of the plan. Any such requirements will be indicated on the application form, instructions, or other communication available to the public.

Any application submitted by an applicant containing a principal that was a principal in an owner that has, in RIHousing's determination, previously participated, on or after January 1, 2019, in a foreclosure in Rhode Island (or instrument in lieu of foreclosure) that was part of an arrangement a purpose of which was to terminate an extended low-income housing commitment (regardless whether the extended low-income housing commitment was terminated through such foreclosure or instrument) shall be rejected from further consideration for low-income housing tax credits and shall not be eligible for any reservation or allocation of credits.

II. APPLICATION PROCESS AND RANKING METHOD FOR 9% CREDITS

A. Funding Rounds

RIHousing may hold up to 3 competitive funding rounds each year for the 9% allocated credits. Funding rounds will be announced by RIHousing via Program Bulletin and/or issuance of a Request for Proposals ("RFPs"), and by advertisement in local print media. RIHousing may adjust the number or timing of funding rounds if required by the passage of federal legislation or adoption of IRS rules and regulations to accommodate variations in demand or for other compelling circumstances. Depending on the strength and number of proposals received in any funding round, RIHousing may, in its sole discretion, create an official waiting list for the LIHTC program year for proposals that demonstrate considerable merit but for which allocable credit is not immediately available. RIHousing will make the waiting list available for public inspection.

During the review period, staff will determine the need for the credit and the financial feasibility of the proposals; however, this determination is not a guarantee by RIHousing of the feasibility or viability of any proposal. In the event that RIHousing determines that the project is not feasible as proposed or that a change in circumstances has materially altered the proposal as submitted and approved, RIHousing reserves the right to rescind reservations of LIHTCs for projects. Any such rescissions shall be in writing and provided to the applicant.

The anticipated schedule for LIHTC reservations is as follows:

First Funding Round

RFP issuance	On or about October 3, 2022
--------------	-----------------------------

Proposals submission deadline	On or about the third Friday in December 2022
Reservation decisions rendered by RIHousing's Board of Commissioners	At the April 2023 Board Meeting

Additional funding rounds will be conducted, if necessary, to allocate remaining credits or returned credits. RIHousing reserves the right to limit competition in subsequent competitive funding rounds to proposals that were submitted in the first and/or second competitive funding rounds.

RIHousing retains the right to award LIHTCs outside of competitive funding rounds to projects which were previously awarded LIHTCs and which either: (a) have returned their previously awarded LIHTCs to RIHousing for use by other developments pursuant to an agreement with RIHousing or (b) qualify for and can demonstrate a need for additional LIHTCs to meet project feasibility requirements. The projects must meet one or more of the following criteria:

- The project incurred or faces substantial, unforeseen cost increases beyond its control;
- The project is subject to a substantial unanticipated reduction in equity yield on the sale of the LIHTCs, or a substantial unanticipated reduction in leveraged debt;
- Supplemental LIHTCs would improve the project's financial feasibility and maintain its consistency with RIHousing's underwriting standards and development policies for multi-family finance.

RIHousing reserves the right to award any additional credits received during any year to qualified projects that were previously placed on a waiting list in prior rounds. RIHousing may consider making a reservation of LIHTCs for qualified application(s) received outside the context of the first or subsequent funding rounds if LIHTCs are available from the previous year. In such event, a general priority will be given to projects which best demonstrate readiness to proceed, and/or projects which have previously received credit awards from RIHousing.

B. Project Selection Process

Applicants are advised to thoroughly review the Allocation Plan, the Developer's Handbook and the application requirements when preparing their application. While RIHousing does not have a formal pre-application process, applicants are strongly encouraged to review potential applications with RIHousing staff prior to submission. It is solely the applicant's responsibility to select a preferred plan of action.

RIHousing's selection process for allocating LIHTCs is designed to select proposals which address the priorities identified in the Rhode Island Consolidated

Plan: 2020-2024, the federal criteria included in IRC Section 42 and the housing needs of the State. A funding committee (the “Funding Committee”) including but not limited to senior staff, and one or more representatives of the Board of Commissioners will evaluate and score applications based on the review criteria stated below.

All tax credit reservations are made based upon the information contained in the application. Upon review of the application, RIHousing staff will advise the applicant of discrepancies or incomplete items and will allow the applicant to clarify or supplement the original application. Such requests will be made in writing to the applicant who will have 10 business days to respond in writing only. **Only clarifications or missing information will be accepted, no substantive changes may be made by the applicant after the application is submitted. A substantive change may include, but is not limited to, modifying the LIHTC request, changing unit count, and adding or removing specific locations from the application.**

RIHousing staff will conduct a review to determine whether a proposal meets the Threshold Criteria (the “Threshold Criteria”). If staff determines that a proposal does not meet the Threshold Criteria, notice will be provided to the applicant prior to the Funding Committee meeting. Threshold determinations are not appealable.

Only those projects that meet the Threshold Criteria will be officially scored. Applications passing threshold will be reviewed and scored against the LIHTC priorities set forth in the Allocation Plan. After applications have been scored by RIHousing staff, but prior to presentation at the Funding Committee meeting, applicants shall be notified of their overall score. Applicants shall have the opportunity to meet with staff to discuss their project scoring and may also appeal the score prior to presentation at the Funding Committee meeting.

Aggregate assessment and score in no way guarantees an award of LIHTCs to a particular development. During proposal review and throughout the LIHTC allocation process, RIHousing will utilize its sound and reasonable judgment and will exercise its discretion consistent with sensible and fair business practices. RIHousing reserves the right not to reserve LIHTCs to any applicant or project, regardless of the proposal’s aggregate assessment and score, if it determines, in its sole and absolute discretion, that 1) a reservation for any applicant or project does not further the purposes and goals set forth in this Allocation Plan; 2) available resources are not sufficient to fulfill a LIHTC request; 3) there exists an over-concentration of projects in a specific geographic location; or 4) there exists an over-concentration of specific production types (e.g. new production, assisted living, preservation or rehabilitation).

In addition, RIHousing reserves the right to adjust aggregate assessments and scores or to rescind a reservation of LIHTCs if there is a material change in the project including, but not limited to, a change in the general partner, the

construction start date which adversely affects the achievement of stated goals and/or diminishes the proposal's ability to address documented housing needs or significant changes to the budget.

In the first round, RIHousing may not allocate all available credits. Credits not allocated under the first round may be allocated at a future date within the credit year to projects submitted under the initial RFP. RIHousing will request updated models and will review and re-score all proposals submitted, even those proposals that did not originally meet the Threshold Criteria.

RIHousing may elect to award a forward allocation of credits to a project provided it is determined that the project meets the objectives of the State's Allocation Plan and that such forward allocation is in the best interests of the project and RIHousing's mission and affordable housing objectives.

If RIHousing allocates LIHTCs from the LIHTC Program outside of the priorities and selection criteria set forth in this Allocation Plan, RIHousing will document and provide a written explanation of its decision to the general public.

III. LIHTC REVIEW CRITERIA

In its mission to meet the statewide need for affordable homes, RIHousing believes it to be in the public's interest to avoid concentration of affordable housing in any one neighborhood, community or corner of the State. As a small state, Rhode Island receives a relatively small statewide allocation of LIHTC. Therefore, within the goals of achieving financially feasible developments, RIHousing will generally seek to fund mid-sized developments in urban, suburban and rural communities rather than larger scale developments.

The LIHTC is the primary funding source for the development of new affordable rental homes in Rhode Island. Therefore, developers applying under the rental production program must meet the following requirements:

- (i) For new production proposals, create a minimum of 30 new units.
- (ii) For proposals contemplating preservation, 30% of the overall units in an application or 20 units, **whichever is greater**, must be newly created affordable homes.
- (iii) As the LIHTC is a highly competitive and scarce resource, no single development may be awarded more than 40% of Rhode Island's annual small-state minimum allocation. **Any application that requests more than 40% of the annual allocation will be disqualified.**

In awarding development resources, including LIHTCs, RIHousing has identified the following priorities:

1. Increase the supply of affordable housing. While the existing stock of affordable housing faces threats from expiring subsidies and use restrictions, deferred maintenance and obsolescence, the extreme need for additional affordable housing makes new production RIHousing's primary housing priority.
2. RIHousing will approve no more than one preservation transaction per funding round for 9% allocated LIHTCs.
3. Dual and equal goals of (a) increasing the supply of affordable housing in communities that have traditionally had a lack of such housing; and (b) reinvesting in urban neighborhoods where housing may be substandard, blight is common, and the housing is part of an overall neighborhood revitalization strategy.
4. Affordable homes must do more than just provide a physical structure. RIHousing identifies these goals with its CCD initiative and prioritizes developments that most effectively achieve these.
5. Because of the limited number of available subsidies, including the capital subsidy from the LIHTC, priority will be given to developments which can viably and effectively serve:
 - a. Very low-income households
 - b. Individuals and families who have experienced chronic homelessness
 - c. Individuals with special needs
 - d. Households with children.
6. Developments that best serve the needs of Rhode Island workers and businesses.
7. Developments that achieve these goals at the lowest cost.

In order to best achieve these goals, RIHousing has established 5 threshold criteria that must be met before a development can be considered for a reservation of LIHTC Threshold Criteria. The 5 Threshold Criteria are set forth here and described in more detail below. They are:

1. The developer and their development team must have experience in the successful development and operation of affordable housing of similar scope and complexity;
2. The development must demonstrate financial feasibility for at least 15 years and have a reasonable likelihood of feasibility for the entire term of financing;
3. The development must have a reasonable likelihood of achieving sustainable occupancy of 95% within 6 months of construction completion;

4. Construction must be reasonably likely to commence within 12 months of preliminary commitment and be complete within 30 months of firm commitment; and
5. The per unit TDC of the project does not exceed an absolute cap of \$429,000 per unit, not included capitalized reserves.

Only proposals that satisfy the Threshold Criteria review will be further considered under the Scoring Criteria.

A. Threshold Criteria

- 1) Development Team Capacity: The developer must have experience in the successful development and operation of affordable housing of similar scope and complexity.
 - The Developer and their development team will be evaluated on its professional capacity to plan, build, market, and operate the proposed development.
 - The performance record of the developer, consultant, architect, management agent and contractor will be measured individually and collectively by the quality and quantity of previous development, design, construction and property management efforts, as well as affirmative action records.
 - Each team member is expected to demonstrate satisfactory prior experience on projects of similar scale and complexity; to have satisfactory professional references; and to devote sufficient experienced staffing and resources to complete the proposed development.
 - If the developer does not have satisfactory prior experience, including but not limited to, the ownership and management of LIHTC projects, they must enter into a joint venture with an entity experienced with the development of LIHTC projects, or demonstrate to RIIHousing's sole satisfaction how they will compensate for the lack of LIHTC experience.
 - The developer (including the ultimate borrower entity) and contractor will also be evaluated for creditworthiness and financial capacity including a thorough review of the developer's audited financial statements for the previous 3 years. Creditworthiness

takes into consideration the financial condition of an organization, management capabilities, character and capacity.

RIHousing reserves the right to deny LIHTCs to any proposal where: (i) any materially participating entity (owner or management agent) is not in good standing regarding compliance monitoring of other LIHTC projects; (ii) any partner, developer or other key development team member has been determined by RIHousing as not creditworthy; or (iii) any partner, developer or other key development team member is on the HUD or RIHousing debarment list.

RIHousing will review each developer's most recent audit to ensure financial capacity to develop the project and manage the development for the long term. In addition, developers will be evaluated based upon the prior performance of existing developments both in RIHousing's portfolio and those financed by others. This review will include: 1) condition and security of existing developments; 2) maintenance and operating of existing developments; 3) leasing and occupancy history; 4) general management practices; and 5) financial management. A credit report will be required for all principals of for-profit developers participating in the LIHTC program.

For service-enriched housing proposals, development team members will also be evaluated on the basis of demonstrated success in: (i) the development, design and construction of housing with supportive services; and (ii) the planning and delivery of services including adequacy of staffing and/or oversight of third-party contracts for services.

2) Financial Feasibility: The development must demonstrate financial feasibility for: (i) the overall development costs of the project and (ii) the long-term operation of the proposal.

- As to development costs, applicant must demonstrate that the proposed budget is adequate and realistic for the proposed project.
- In regard to operations, the proposal must demonstrate financial feasibility for at least 15 years consistent with RIHousing's underwriting guidelines and have a reasonable likelihood of feasibility for the entire term of financing.
- RIHousing reserves the right to deny LIHTCs to proposals for which adequate funding sources have not been identified for all development costs or development costs do not appear to be consistent with the scope of the proposal. This includes a commitment of syndication. While commitments from these

sources do not have to be secured before applying for LIHTCs, the applicant must be able to demonstrate to RIHousing's satisfaction that the sources identified will be available to the developer within 9 months of the reservation of credit.

- For mixed income developments, an agreement with the municipality on the real estate tax assessment associated with the market rate units should include, at a minimum, an analysis of how the units will be assessed, the methodology for valuing the market rate units, the cap rate, if applicable, and the time frame associated with the tax assessment agreement.
- Documentation must be provided demonstrating that the municipality has agreed to limit taxes on the affordable units to 8% of the gross scheduled rental income for the real estate tax calculation or lesser percentage determined by the municipality.

3) Marketability: The development must have a reasonable likelihood that it will achieve sustainable occupancy of 95% within 6 months of construction completion. For mixed income proposals that meet the 20% at 50% or 40% at 60% set asides, the applicant must submit a third-party market study that includes an absorption schedule, lease-up reserve and identifies the timeline for achieving 95% occupancy. Marketability of all projects will be evaluated relative to the proposed locality of the development, target market population, rent levels and affordability, project design and amenities. Developers will be required to demonstrate marketability through such documentation as:

- Information on market comparables;
- Information on the supply and quality of the existing housing stock and rent burdens;
- Information on other planned development/revitalization activity in the area;
- Assessment of potential impact on the financial and operating viability of existing subsidized housing developments; local demographics (including income, age and any special needs characteristics); marketing and outreach strategies;
- Information demonstrating that the proposed location is appropriate for the target population in terms of environment, quality, proximity to services, and attractiveness of the site and its surroundings.

- Mixed use developments must provide the marketability information for both the residential and commercial components.

Developers are encouraged to set rents so that the proposed rents are affordable to residents in a given location and not simply set at the program's maximum rents. One aspect of a development's marketability is to have rents that are affordable and attractive to prospective tenants. Therefore, additional consideration will be given to projects that demonstrate that the proposed LIHTC rents are below those of comparable, unassisted units in the market.

- 4) Readiness to Proceed: Applicants must demonstrate that construction is reasonably likely to commence within 12 months of reservation of credits and be complete within 30 months of reservation. To receive and maintain a reservation of LIHTCs, all developers must demonstrate readiness to proceed throughout the pre-development process. An assessment of a proposal's initial readiness to proceed will be made based on the developer's ability to achieve the following within 9 months of an executed reservation letter for LIHTCs: (i) receive all written land use and zoning approvals and building permits; (ii) complete all regulatory, environmental, and historical reviews; (iii) maintenance of site control; (iv) secure all funding commitments; and (v) demonstrated financial feasibility.

Continued readiness to proceed will be determined by RIHousing, in its reasonable judgment, based on factors such as: (i) a developer's ability to meet the requirements to receive a Carryover Allocation Agreement ("CAA"); (ii) finalize and complete design development and contract drawings; (iii) secure an executed commitment letter with a LIHTC investor; (iv) demonstrate continued financial feasibility including, but not limited to, a signed schedule of values from a general contractor based on an approved set of plans and specifications; and (v) close on all financing and commence construction within 12 months of reservation for LIHTCs.

RIHousing will use its best professional judgment in evaluating an application for readiness to proceed. Staff will consider the developer's past performance in meeting permitting, funding and closing deadlines in projects of similar scope and size, and present their recommendations to the Funding Committee for a final award decision.

- 5) Total Development Cost Cap: The per unit total development cost ("TDC") of any project, regardless of which building type it is proposing, cannot exceed \$429,000 per unit not including capitalized reserves. Any proposal exceeding the TDC cap, will be ineligible for an award of LIHTCs.

For projects proposing a hybrid transaction in which a developer seeks both an allocation of 9% LIHTC and a simultaneous financing plan seeking an allocation of tax exempt bonds and 4% Credits (a “Hybrid Development”), developers must conform their applications for both the 9% and 4% proposals to the RIHousing requirements for such transactions contained in Program Bulletin 2022-2 and Section 12 of the Developer’s Handbook.

RIHousing will require proposed Hybrid Developments to be of a scale necessary to produce demonstrable savings of resources in exchange for the higher complexity of the execution and to otherwise meet the requirements set forth in the Program Bulletin. In evaluating a proposed Hybrid Developments, RIHousing will consider, among other things: (i) the Applicant’s experience in successfully completing the proposed hybrid structure and organizational depth and capacity to undertake complex transactions, (ii) simultaneous financing for each tranche, and (iii) demonstrated cost savings and increased units as a result of a Hybrid Development.

For any project proposing market rate units (whether in a 9%, 4% or Hybrid transaction, the gap funding request (i.e. non-equity) must be used to primarily support the development of the affordable units, not the market rate units.

B. Scoring

Point Allocation Summary

25 points	TDC
20 points	LIHTC Efficiency
5 points	Leverages rental and operating subsidy such as: HUD’s Rental Assistance Demonstration program, Section 811 program, Federal or State Rental Assistance program.
10 Points	Leverages hard debt, Non-RI Housing or non-State Competitive Housing Resources such as FHLB funding or Federal and State Historic credits
6 Points	The provision of 3+ bedroom units
6 points	Serves very low-income, homeless and/or special needs persons
3 points	Rhode Island Construction Firms
8 points	Fully permitted development
26 points	Alignment with CCD goals
10 points	Located in a community with less than 10% affordable homes
5 points	Addresses vacant, foreclosed and blighted properties

- 3 points Energy Star & Tier II
- 3 points Passive Housing
- 3 points Renewable Energy
- 5 points Preservation of Greenfields

Total 138 points

(15) Negative points if applicable

FINANCING POINTS (Up to 66 points)

A. Up to 25 points - TDC per residential unit based on construction type as defined below. If submitting a proposal with 2 types of construction, provide a breakout of TDC by type.

Projects will fall within six categories of building type and RIHousing has determined a maximum TDC (the “Overall TDC”) within each building type. **The maximum per unit Overall TDC can be found in the Program Bulletin included in the 2023 Developer’s Handbook.** The building types and Overall TDC are as follows:

Building Type	Maximum per unit Overall TDC
Urban (includes scattered site and urban in-fill)	Refer to Section 9 of the 2023 Developer’s Handbook
Historic Mill Conversion	
Suburban/Rural Cluster Subdivision (buildings contain less than 8 units per building)	
Garden style apartment up to 3 stories (no elevator)	
Up to 4 Story building with elevator	
4 or 5 Story Stick built on Podium Parking	

While the Overall TDC costs above are limits based on comparisons of previous RIHousing funded projects and RS Means, the scoring will be calculated on a weighted average (the “Weighted Average TDC”), based on bedroom size to ensure parity between projects that cater to different populations. Project applications will be evaluated for cost reasonableness using an index, which is the Weighted Average TDC per unit and the TDC per bedroom. For mixed-use projects, the Weighted Average TDC for only the residential portion of the project, including common areas, will be used for this calculation. Capitalized reserves will be excluded from the TDC calculation. The Weighted Average TDC will be calculated as follows:

$$([2 * \text{TDC/unit}] + [\text{TDC/\# of bedrooms}]) \text{ divided by } 3.$$

The Weighted Average TDC will be the basis for scoring the TDC per unit. TDC points will be based on \$5,000 increments. The calculations will be built into the proforma.

Proposals that include both new construction and preservation will require a Weighted Average TDC for both new construction and preservation. The 2 amounts will then be averaged for a final Weighted Average TDC.

Note: Efficiency apartments will count as a one-half bedroom in the Weighted Average TDC calculation.

Extraordinary Conditions:

Projects with extraordinary conditions that increase costs beyond the TDC caps should provide detailed back-up outlining the reasons for the higher costs. Acceptable extraordinary conditions are limited to the following:

1. Excessive environmental remediation defined in a remedial action work plan required by the either the Environmental Protection Agency, the RI Department of Environmental Management, or the Coastal Resources Management Council.
2. The demolition of non-contributing structures to facilitate the leveraging of historic LIHTCs.
3. The calculation of prevailing wages.
4. The installation of on-site water service and water treatment systems in rural locations.

If the applicant is seeking relief under one of these extraordinary conditions, they must provide itemized breakdowns of these costs prepared and attested to by a general contractor. These costs will be evaluated by RIHousing to ensure consistency with the industry and will then be deducted from the unweighted TDC before applying the Weighted Average as described above.

In order to ensure that applicants are submitting realistic pricing for their proposals, if allocated LIHTC, the first 10% of cost overruns above the preliminary budget, will be absorbed by a like reduction in paid developer fee before any additional LIHTC or soft funds will be allocated to the project.

B. Up to 20 points - LIHTCs per residential unit. Applications with more than \$30,000 per credit per unit will receive 0 points. The points will increase by 1 for every \$1,000 below the maximum.

Weighted Avg units: $([2 * \# \text{ of bedrooms}] + [1 * \# \text{ of units}]) \text{ divided by } 3$

The product, the Weighted Average Credit per Unit, will be the basis for scoring the LIHTC per unit. LIHTC per unit points will be based on \$1,000 increments. The calculations will be built into the proforma.

Note: Efficiency apartments will count as one-half bedroom in the Weighted Average calculation.

C. Up to 5 points for leveraging committed state and federal funds from rental and operating subsidy programs such as a Project Based Section 8 rental contract, HPF-ELI operating subsidy or other similar federal and state program.

20% or more units in the development	5 points
10-19% of units in the development	3 points
up to 9% of units in the development	0 points

D. Up to 10 points – Leveraging of (i) hard debt, or (ii) non-RI Housing or non-State competitive housing resources (e.g., USDA funding, Municipal, Federal and/or State Historic Credits, Rebuild Tax Credits, FHLB, private grants, etc.). Less than \$20,000 per unit will receive 0 points. The points will increase for every \$1,000 above the minimum.

≥\$60,000 per unit	10
≥\$50,000 per unit	8
≥\$40,000 per unit	6
≥\$30,000 per unit	4
≥\$20,000 per unit	2

E. Up to 6 points – The creation of three bedroom or larger units

% 3-bedroom units of overall unit count	Bonus Points
10%	2
20%	4
30%	6

No points will be awarded for projects with less than 10% of the overall units being 3+ bedrooms.

GENERAL POINTS (up to 17 points)

A. Up to 6 points for effectively serving people: (i) who have income at or below 30% of median income, (ii) are homeless and coming from the Coordinated Entry List or (iii) have special needs.

For developments in which the owner **will** be partnering with a service provider to provide supportive services:

- 6 points – 21% or greater of the total number of units in the development
- 4 points – 11- 20% of the total number of units in the development
- 2 points – up to 10% of the total number of units in the development

A service plan and memorandum of understanding with a service provider is required for homes that are intended for persons with special needs.

For developments in which no supportive services will be provided:

- 3 points – 21% or greater of the total number of units in the development
- 2 points – 11- 20% of the total number of units in the development
- 1 point – up to 10% of the total number of units in the development

B. Up to 3 points for utilizing Rhode Island based firms.

- 3 points for an applicant that certifies in the application that up to 50% of the sub-contractor contracts will be awarded to Rhode Island based construction firms.

C. Up to 8 points for a development that at the time of application has all applicable regulatory agency permits including: municipal permitting bodies (local planning, zoning and building permit approvals) and state regulatory agencies (Department of Environmental Management and Coastal Resources Management Council).

- 8 points for a fully permitted development that has building permits secured AND specifications are at least 90% complete AND architect confirms in writing that the plans and specifications can be 100% complete within 30 days AND the application includes a signed schedule of values from the general contractor, determined by RIHousing to be consistent with current pricing, that is the basis for the funding application.
- Up to 6 points for master, preliminary and final plan approval for a development or for a development with “by right” approval. Points will be prorated based on approvals in place at time of application.

Proposals that do not have zoning approval at the local level typically cannot meet the Readiness to Proceed Threshold Requirement. Applicants that cannot demonstrate zoning approval or the ability to build “by right” are discouraged from applying unless

they can demonstrate they can secure approvals within 6 months of preliminary approval of a LIHTC award.

COMPREHENSIVE COMMUNITY DEVELOPMENT (Up to 26 points)

TRANSIT AND CONNECTIVITY		Points
Development receives a Walk Score measurement of 40-60 (1 point) or 60+ or higher (2 points)		Up to 2
Development provides interior bike storage for at least 1 bike per residential unit		1 point
Development ties into existing bike routes		1 point
RI adapted transit scoring system		Up to 2
• Development is within ½ mile of a bus stop	1 point	
• Development is within ¼ mile of a bus stop	2 points	
• Alternative transit options - other no or low-cost transportation services available to all residents which can be documented with a letter or agreement with the provider	.5 points	
AREAS OF OPPORTUNITY		
The statewide average HS graduation is 84%. See the 2022 KidsCount for reference RIKCFactbook2022 (rikidscount.org)		Up to 2 points
• Communities with HS graduation rate equal to or greater than 92%	2	
• Communities with HS rates between 84% and 91.99%.	1	
• Communities with HS rates less than 84%	0	
Development has a mixed-use component that includes rental space for a commercial business(s) (which can be in a separate ownership structure such as a condominium). Commercial income must be reflected in the budget; additional point for spaces that create jobs for local community members and/or service the local community.		Up to 2 points

<ul style="list-style-type: none"> Includes commercial component (can be in basis if consistent with the Code) 	1	
<ul style="list-style-type: none"> Creates jobs for local community members and/or service the local community 	1	
Development will have a range of income levels and at least 15% of the units are considered unrestricted (under LIHTC) units.		Up to 3 points
15% of the units are market rate	1	
Up to 20% of the units are market rate	2	
More than 30% of the units are market rate	3	
Development is designed using Crime Prevention Through Environmental Design (CPTED). Please see www.planning.org/pas/quicknotes /open/pdf/Qn42.pdf for the key principles of CPTED. Please note which principles have been incorporated		1
ENGAGEMENT AND SERVICES		
Developer is a community-based nonprofit that has a demonstrable track record of community engagement, is incorporated in the state of RI, has IRS 501(c)3 status and has operated housing in the neighborhood or similar neighborhoods in the state. The qualifying non-profit developer may be part of a joint venture if they own at least 50% of the general partner interest of the borrower entity.		3
Developer has participated in a public engagement process that includes community meetings and community input beyond those held for the locally mandated approval process (must be documented), and the process was conducted within 12 months of the date of application for LIHTC.		1
Proposal is in a QCT and/or there is a Concerted Community Revitalization Plan that meets the criteria outlined in the Federal Criteria section of the Allocation Plan		1
Development certifies compliance with the Affordable Connectivity Program included in the 2021 Federal Infrastructure Bill.		Up to 3 points
<ul style="list-style-type: none"> Qualified Tenants (income at or below 200% of the federal poverty level("FPL")) must pay \$9.99/month (or required minimum per program) and the property 		2

owner coordinates \$30/month subsidy for 100 megabit per second, or higher speed, service from the service provider.		
<ul style="list-style-type: none"> Alternatively, for income eligible residents with incomes above 200% of the FPL but less than 60% of AMI, Development provides 100 megabit per second, or higher speed, service at a cost to the resident of no more than \$9.99/month. 		3
<p>For the alternative metric above (residents over 200% of FPL) the cost for broadband provision must be reflected in the proforma operating budget, and cost itemized for review.</p> <p>The application must include a written proposal for the provision of the infrastructure that supports the proposed broadband service.</p> <p>At a minimum, the applicant must commit to providing the service for 15 years from the last placed in service date.</p>		
<p>Development incorporates the space and/or provides supportive services to residents based on the list of prioritized services outlined in the Prioritized Supportive Services Table below.</p> <p>Qualifying Standards:</p> <ul style="list-style-type: none"> MOU between applicant and provider included in application, outlines costs and includes a narrative describing services to be provided. Minimum of 24 hours per year of services to be provided, outcomes and attendance to be tracked. Services must be free to all income and/or age qualified residents. Transportation, where applicable, provided at no cost Residents must be made aware of all services available 		Up to 4 Points

Prioritized Supportive Services Table		
2 Points	1 Point	0.5 Points
Childcare	Tutoring / College Planning	Art / Music / Writing Classes
Adult daycare	Employment Services	Nutrition Classes
Job Training	Resume Building Classes	Sports / Exercise classes
GED / Continuing Education	Medicaid Waiver Assistance	Movie nights
Behavioral Health Counseling	YMCA collaboration	Resident Meetings
Case Management for Permanent Supportive Housing		
This list is not meant to be exhaustive. If you intend to provide additional services, please outline in your narrative and estimate the eligible points		

COMMUNITY (up to 15 points)

- A. 10 points – A proposed development which is located within a community with less than 10% affordable housing as defined by state law; **OR**

5 points - A proposed development in an exempt community with less than 10% affordable housing as defined by state law. Refer to the Developer's Handbook for the current list of eligible communities; **OR**

5 points – A development in an exempt community which provides 0%-60% AMI units in a census tract with an average AMI that exceeds 100% of AMI for that municipality.

- B. Up to 5 points – A development that includes rehabilitation of vacant, foreclosed and/or blighted properties OR infill development on vacant neighborhood lots. An infill lot is defined as a lot in an established and developed neighborhood and development serves to integrate the streetscape and fabric of the neighborhood. A unit must be non-habitable, be designated blighted by the municipality within which it is located or have failed an HQS inspection to be considered blighted.

- 5 points: 100% of the total number of units in the development
- 4 points: 80-99% of the total number of units in the development
- 3 points: 60-79% of the total number of units in the development
- 2 points: 40-59% of the total number of units in the development
- 1 point: 25 -39% of the total number of units in the development

EFFICIENCY (Up to 14 points)

Rhode Island Residential New Construction (“RNC”) Tier I standards under National Grid’s (“NGRID”) program guidelines are the baseline requirement of RIHousing’s current design and construction guidelines. These standards are slightly more stringent than the current R.I. State Energy Conservation Code Standards. Additional points may be awarded for exceeding the Tier 1 standards as set forth below:

- A. Up to 3 points may be awarded to new construction developments that achieve NGRID’s RNC Tier II **AND** Energy Star 3.1 revision 8 standards (or most current standards at time of application) to obtain a higher level of documented energy efficiency. The additional standards should be specifically itemized for review otherwise no points will be awarded; OR

Projects undertaking substantial rehabilitation rather than new construction will be awarded up to 3 points if they demonstrate an ability to achieve NGRID’s RNC Tier II standards. The additional standards should be specifically itemized for review otherwise no points will be awarded: OR

For Historic Mill rehabilitation projects, 1 point will be award to projects that achieve Level 1 under the NGRID Rhode Island Adaptive Reuse Program and 2 points if they achieve Level 2 under this same program.

- B. Up to 3 additional points may be awarded to projects that achieve RNC Tier III **AND** meet the State’s most current Net Zero or Passive House standards.

- <https://www.phius.org/home-page> PHIUS
- <https://www.energy.gov/eere/buildings/zero-energy-ready-homes> ZERO Energy Ready Home
- <http://www.energy.ri.gov/policies-programs/lead-by-example/rhode-island-stretch-codes.php> Rhode Island Stretch Code
- https://www.nationalgridus.com/media/pdfs/resi-ways-to-save/ee6174_ri_newconsprogram.pdf

- C. Up to 3 points may be awarded to those developments that incorporate Photo Voltaic solar panels (“PV”) or other renewables including net metering (as defined in R.I.G.L. Chapter 39-26-5). Developments will receive points as follows:

- 1 point if the proposed PV array system or other renewable energy system(s) is/are large enough to cover no less than 50% of the project’s

annual common area and site electric load as calculated by a qualified engineer

- 2 points if the proposed PV array system or other renewable energy system(s) is/are large enough to cover no less than 100% of the project's annual common area and site electric load as calculated by a qualified engineer.
- 3 points if a Development incorporates a PV array or other renewable energy systems that are sufficiently sized to create a net-zero development based on the overall plans and specifications for the property.

D. 5 points for a development that does not involve destruction of fields, forests, agricultural lands or environmentally sensitive land, and/or includes a cluster development in which more than 50% of the land is conserved.

NEGATIVE POINTS (assessed by RIHousing based on borrower's inability to perform under a previous allocation of LIHTCs).

- Negative 5 points for having a higher TDC per unit at the closing of the developer's previous LIHTC transaction that would have resulted in lower points at the time the proposal was initially scored; provided however, that if the developer has secured additional non-RIHousing and non-State gap funding to offset the cost, no penalty will be assessed.
- Negative 5 points for higher LIHTCs per unit at the closing of the developer's previous LIHTC transaction that would have resulted in lower points at the time the proposal was initially scored.
- Negative 5 points for developer not closing their previous LIHTC transaction within 12 months of preliminary approval. Exceptions may be made for circumstances that, in RIHousing's sole determination, were outside the developer's control.

At a minimum an applicant subject to a negative point assessment, must submit an application that meets threshold and results in a score that is equal to or higher than the lowest scoring application in the funding round.

C. Scoring Assessment Criteria

Borrowers should note the assessment scoring criteria, requirements and guidance that are applicable to the selection of proposals.

1. Financial Analysis:

- a) TDC: Development and construction costs will be reviewed for adequacy and reasonableness in accordance with the guidelines established in the RIHousing Developers Handbook. Staff will consider the documentation submitted in support of the proposed costs, sources and uses; the development team's past performance in achieving the costs set forth in prior applications for funding and prior projects; and RIHousing's own expertise and experience with housing developments.
- b) Management Plan/Operating Budget: Operating budgets will be reviewed to determine adequacy and reasonableness of each expense line item, including but not limited to management fees, maintenance and administrative costs, replacement reserves, taxes, insurance, and costs of any planned tenant services. Proposed operating budgets will be compared to the applicant's own portfolio as well as similar type developments in the RIHousing portfolio. Proposed management agents and management plans will be reviewed to

determine the acceptability of planned procedures for managing the development's operations.

Existing portfolio performance is a key component of RIIHousing's review. RIIHousing staff will review the overall risk rating associated with each previously funded project in our portfolio to assess the strength of the owner and management agent, and their ability to address operating challenges over the life of the loan.

For service-enriched housing proposals, management plans will also be reviewed for demonstrated appropriateness and sufficiency of planned services for the target population, the inclusion of a cohesive, well-conceived and financially feasible service program, and the organizational capacity of the service provider(s) to deliver the proposed services.

2. Serving the Needs of Very Low-income Individuals and Families:

Rhode Island has adopted Open Doors Rhode Island which is a strategic plan to prevent and end homelessness. The plan can be accessed at: <http://ohcd.ri.gov/freq-requested/documents/openingdoorsri.pdf>. The goals of the plan are to end chronic homelessness in 5 years, end veteran's homelessness in 5 years and to end homelessness for families and youth in 10 years.

3. Rhode Island Based Firms:

To provide employment opportunities for the Rhode Island workforce, points will be given to borrowers that certify their general contractors will utilize Rhode Island based subcontractors.

a. Permitting:

There are substantial costs associated with permitting a development. However, significant delays in proceeding to construction can result from various local and state permitting processes. Recognizing the cost/benefit of fully permitting a development prior to the award of financing, RIIHousing will provide a range of points for those developments that have received various permitting approvals.

b. Site Design:

The proposed site, including any existing improvements, must support the intended population in terms of desirability of location; environmental quality; adequacy of utilities and transportation; proximity and connections to jobs, civic, social, commercial, recreational, and services; and appropriateness of the proposed development to the specific site.

In addition, site conditions will be evaluated in terms of suitability for construction or rehabilitation. For new construction, ledge, wetlands, existence of subsurface contamination, grade, soil suitability, and base flood elevation (“Base Flood Elevation”) are typical considerations. For rehabilitation, existing structural conditions, ease or difficulty of adaptations, abatement of hazardous materials, appropriateness of existing buildings, layout and site plan for the proposed resident population will be considered.

As a general rule, developments will only be eligible for financing if the residential buildings are not constructed on land which is in a Base Flood Elevation (100-year flood) as determined by RIHousing in accordance with the most current flood insurance rate maps issued by the Federal Emergency Management Agency (“FEMA”); and comply with other applicable requirements of law, as they may be amended from time to time. RIHousing may consider granting a waiver to the Base Flood Elevation Requirement, if the Developer seeking to construct or rehabilitate a building in a Base Flood Elevation, can demonstrate to RIHousing's satisfaction that upon the occurrence of an event of the magnitude of the 100 year flood: (i) there will not be an unreasonable risk of bodily injury or harm to the residents; (ii) the ground floor units, building egress, site egress and parking areas are constructed above 100-year flood elevation; (iii) the structural integrity, systems and interior finishes of the building will not be materially and adversely affected; (iv) the building will remain functional; (v) the construction or renovation of the buildings will not result in increased flooding elsewhere and (vi) the property is covered by flood insurance in strict conformance with RIHousing’s insurance requirements.

In addition, all developments located in a 100-year flood plain will be required to provide a flood plain engineering report and, if necessary, an evacuation plan prepared by a qualified civil engineer or land surveyor. Developments which receive federal funding will also be required to meet HUD’s 8-Step floodplain standards. The decision of RIHousing shall be binding and conclusive.

4. Comprehensive Community Development:

a. **Transportation and Connectivity:**

Specifically identifying transportation and connectivity in the Plan prioritizes proximity and access to jobs, education, and civic, social, commercial, and recreational facilities. Walkable, mixed-use neighborhoods create physical foundations for a community. Ensuring that the development is close and accessible to transit, makes it transit-oriented. Consideration will be given to proposed developments where the Walk-Score information does not reflect recent changes to the area surrounding the proposed development.

b. Areas of Opportunity:

By emphasizing areas of opportunity, the Plan recognizes the goal of maximizing opportunities and services for residents. HUD considers area of opportunity as high opportunity neighborhoods that have a “positive effect on the economic mobility of residents”. The common indicators of an area of opportunity include low-poverty, educational and economic opportunity, and health care:

- Access to education – neighborhoods with access to hi-performing schools
- Economic Growth/Jobs - Access to jobs and/or low unemployment rates within a community
- Income Levels – high income levels and/or low poverty rates
- Access to Health Care – Hospitals, doctors and or health services are in close proximity to housing.

c. Engagement and Services:

This section recognizes the importance of ensuring that the community within which a proposed development will be located, and the potential beneficiaries of that development are aware of the proposal throughout the predevelopment process, and where appropriate can provide active feedback. Equally critical is the assurance that residents have the services they need to succeed and thrive. The Plan seeks to incentivize the provision of access to broadband and services such as childcare, job training and health counseling that prioritize educational, health and economic benefits for residents.

5. Geographic Diversity:

To further the goal of affordable housing across the state and in furtherance of HUD’s recognition of Areas of Opportunity, points for geographic diversity will be awarded under one of 3 possible categories:

1. In an effort to provide affordable homes in every community in Rhode Island and to assist communities that have been unable to reach a 10% affordable housing goal, 10 points will be given to developments creating new affordable units located in areas with less than 10% existing affordable housing.
2. Exempt communities with less than 10% affordable housing will be given 5 points.
3. The development of housing in census tracts in exempt communities with an average AMI that exceeds 100% of AMI will be given 5 points.

Applicants must demonstrate the need and demand for the housing proposed in the application.

6. Vacant, Foreclosed and Blighted Properties and Infill Lots:

Vacant, blighted and abandoned properties have a negative impact on our neighborhoods and communities.

- A unit must be non-habitable or have failed an HQS inspection to be considered blighted.
- An infill lot is defined as a lot in an established and developed neighborhood regardless of whether it had been plotted or not.

Applicants must demonstrate how the proposed housing contributes to an overall plan to revitalize and/or stabilize the neighborhood or that builds upon previous investments.

7. Efficiency:

RIHousing strives to ensure that developments are as energy efficient as possible and to the extent financially feasible, incorporate many of the industry's current green building practices. Points will be awarded to new construction developments that achieve NGRID's RNC Tier II and Energy Star 3.1 revision 8 standards to obtain a higher level of documented energy efficiency. The additional standards should be itemized for review.

Projects undertaking substantial rehabilitation rather than new construction will be eligible for partial points if they can achieve Tier II of standards under NGrid's program guidelines.

Additional points may be awarded to projects that achieve RNC Tier III **AND** meet the State's most current Net Zero or Passive House standards.

RIHousing has been working with NGRID and the Office of Energy Resources to develop strategies for improving energy efficiency in existing and new affordable housing, and to incentivize the use of renewable resources. The recent change in legislation to allow Virtual Net Metering in affordable housing is an additional opportunity to leverage these resources. See Chapter 26.4 of Title 39 of the General Laws of Rhode Island ("RIGL"), entitled "Net Metering" and more specifically "Community Remote Net Metering" as defined at RIGL Sec. 39-26.4-2(1).

Points will be awarded for developments that include PV or other renewable energy sources with enough capacity to offset a determined amount of annual operating costs.

8. Preservation of Greenfields:

In recognition of the need to preserve Rhode Island's diverse natural resources, RIHousing has placed high priority on protection of our working farmlands and forested areas. Points will be provided for a proposal that does not involve destruction of fields, forests, agricultural and other environmentally sensitive land and/or includes a cluster development in which more than 50% of the land is conserved.

D. Non-Profit Set-Aside, 9% Credits

Pursuant to IRC Section 42(h)(5)(B), RIHousing will set-aside a minimum of ten percent (10%) of the total LIHTC allocation, as required by IRC Section 42(h)(5)(B), for non-profit organizations that materially participate in the development and management of the project throughout the compliance period. The allocation of this set-aside to qualified non-profits will be determined by RIHousing in its sole discretion. These credits will be administered in the same manner as LIHTCs allocated to for-profit developers.

In order to qualify for credits from the non-profit set-aside, organizations must certify that they are a qualified non-profit organization and any substitute owner during the compliance period must continue to qualify under that set-aside. The term "qualified non-profit organization" means any organization that is described in Section 501(c)(3) or (4), is exempt from tax under Section 501(a), and includes as one of its exempt purposes the fostering of low-income housing.

E. Assisted Living Program

LIHTCs from the state per capita allocation and those provided through tax-exempt bond financing are available to borrowers proposing assisted living developments, provided that the proposal identifies long term funding for essential services.

F. Supportive Housing

LIHTCs from the state per capita allocation and those provided through tax-exempt bond financing are also available to borrowers proposing permanent housing developments with supportive service options for residents. Critical to the evaluation of these proposals will be the availability and commitment of sustainable funding for the proposed services and operating or rental assistance to assure long-term feasibility.

LIHTC regulations prohibit sub-leasing of units to agencies. Owners should not enter into a master lease agreement with service providers. Tenants must execute a lease for a unit. A contract between the owner and service provider should be executed to ensure the provision of services for a tenant.

IV. TAX EXEMPT FINANCING WITH 4% CREDIT

Applications for tax exempt financing are currently received on a rolling basis. While proposals utilizing tax-exempt bond financing with 4% credits may not be required to participate in a competitive funding process, all development proposals must meet the requirements of the Allocation Plan and Developer's Handbook.

V. UNDERWRITING GUIDELINES

RIHousing guidelines for underwriting, general contractor fees, reserve requirements, developer's fees, and soft costs can be found in the RIHousing Developer's Handbook at <https://www.rihousing.com/developers-handbook/>. The costs associated with these guidelines must be incorporated into the TDC for all proposals requesting LIHTC from RIHousing. The guidelines may be amended from time to time through Program Bulletin.

VI. FEE STRUCTURE FOR LIHTC PROPOSALS

All LIHTC proposals, including those seeking credits from the State's allocated pool or in conjunction with tax-exempt bond financing, shall be assessed the following fees:

A. Application Fees:

LIHTC proposals will be assessed a \$1,500 non-refundable application fee, payable upon application submission.

B. Underwriting Fee:

RIHousing will charge an underwriting fee for the review of all 4% and 9% credit proposals

Up To \$1,000,000	\$20,000
Up To \$3,000,000	\$25,000
Greater than \$3,000,000	\$35,000

If RIHousing provides the first mortgage financing, these underwriting fees will be applied toward RIHousing's origination fees. However, the underwriting fee will be charged if RIHousing is not the permanent senior lender. A **minimum** combined origination/underwriting fee of \$20,000 will be paid if the loan amount is less than \$1,000,000.

C. Allocation Fees:

Approved LIHTC proposals will be assessed the following LIHTC allocation fee, payable at closing:

For 9% LIHTC Developments: 0.5 % of the 10-year allocation amount

For 4% LIHTC Developments: 1.0 % of the 10-year allocation amount

VII. COMPLIANCE MONITORING

Please refer to RIHousing's compliance monitoring manual which was updated in 2021 (the "Compliance Manual") for detailed monitoring requirements.

<https://www.rihousing.com/wp-content/uploads/RIHousing-LIHTC-Manual-Revised-March-2021-highlighted.pdf>

The compliance monitoring procedure is adopted pursuant to IRC Section 42. RIHousing or its agent reserves the right to amend this procedure as may be necessary or appropriate to conform to applicable changes in IRC Section 42 or regulations. In addition, RIHousing or its agent may adopt further monitoring forms and procedures as part of its Compliance Manual or as otherwise deemed appropriate.

Upon project completion, owners are required to obtain an independent third-party audit of 100% of the initial qualifying tenant files. This audit cannot be performed by the investor. Documentation of such audit must be submitted to RIHousing along with the Initial Qualifying Tenant ("IQT") report, the 8609(s) and the Cost Certification. The IQT must list the initial qualifying households and must coincide with the initial Tenant Income Certifications on file. Owners and agents are also required to attend a welcome meeting with RIHousing Asset Management and Loan Servicing staff.

BORROWERS AND OWNERS ARE ADVISED THAT COMPLIANCE WITH THE REQUIREMENTS OF IRC SECTION 42 OF IS THE RESPONSIBILITY OF THE OWNER OF THE DEVELOPMENT. MONITORING OF THE DEVELOPMENT BY RIHOUSING OR ITS AGENT DOES NOT IN ANY MANNER AFFECT, MODIFY, OR SUBSTITUTE FOR THIS RESPONSIBILITY. MONITORING BY RIHOUSING OR ITS AGENT DOES NOT CONSTITUTE A DETERMINATION OF ANY KIND REGARDING THE DEVELOPMENT'S ELIGIBILITY FOR LIHTC UNDER IRC SECTION 42.

A. Recordkeeping and Record Retention

Recordkeeping: For each year in the compliance period, which is equal to 15 taxable years beginning in the first year the credit is taken, the owner shall maintain records for each building in the project showing the:

- 1) Total number of residential rental units in the building (including the number of bedrooms and the size in square feet of each residential rental unit).
- 2) Percentage of residential rental units in the building that are low-income units.
- 3) Rent charged on each residential rental unit in the building, supporting documentation, and the applicable utility allowance.
- 4) Number of occupants in each low-income unit.
- 5) Annual income certification of each eligible tenant.
- 6) Documentation to support each eligible tenant's income certification.
- 7) Student status of all household members.
- 8) Waiting Lists and marketing/advertising information.
- 9) Unit vacancies in each building and information that shows when, and to whom, the next available units were rented.
- 10) Eligible basis and qualified basis of the building at the end of the first year of the credit period.
- 11) Character and use of the non-residential portion of any building included in the building's eligible basis that are resident facilities available on a comparable basis to all residents and for which no separate fee is charged for use of the facilities (or facilities otherwise reasonably required by the development).

Record Retention: The owner shall retain records relative to the first year of the credit period for at least 6 years beyond the due date (with extensions) for filing the tax return for the last year of the compliance period of the building. The owner shall retain the records described above for all subsequent years in the compliance period for at least 6 years after the due date (with extensions) for filing the federal income tax return for that year.

Additionally, for each year that any Agreements remain in effect after the compliance period, the owner shall retain records adequate to demonstrate compliance with the terms and conditions of the Agreement, including, but not necessarily limited to, income of tenants and rents charged at the development. The owner shall retain the records pertaining to a particular year for at least 6 years following the close of that year.

B. Certifications and Reporting

Annual Certification: The owner of every project that has received LIHTCs must submit to RIHousing by January 31st of each year during the compliance period and the extended use period an owner's Annual Certification of Continuing

Program Compliance and evidence of Certification of LIHTC Training. As required under Treasury Revenue Regulation 1.42-5, the owner shall certify to RIHousing under the penalty of perjury, whether for the preceding 12-month period:

- 1) The project was continually in compliance with the terms and conditions of its Agreements with RIHousing.
- 2) The project met either (i) the 20-50 test under IRC Section 42(g)(1)(A), (ii) the 40-60 test under IRC Section 42(g)(1)(B) or (iii) the average income test, whichever minimum set-aside test was applicable to the project.
- 3) There was any change in the applicable fraction as defined by IRC Section 42(c)(1)(B) of any building in the project, and if there was a change, a description of that change.
- 4) The owner has received an annual income certification from each low-income tenant, and documentation to support that certification.
- 5) Each low-income unit in the project was rent restricted under IRC Section 42(g)(2).
- 6) All units in the project were for use by the general public (as defined in Treasury Regulation 1.42-9), including the requirement that no finding of discrimination under the Fair Housing Act, 42 U.S.C. 3601, et seq., occurred in the project.
- 7) Each building in the project was suitable for occupancy, taking into account local health, safety and building codes.
- 8) There was no change in the eligible basis (as defined in IRC Section 42(d)) of any building in the project, or there was a change, and information regarding the nature of that change.
- 9) All tenant facilities included in the eligible basis under IRC Section 42(d) of any building in the project were provided on a comparable basis without charge to all tenants in the building.
- 10) If a low-income unit in a building becomes vacant during the year, reasonable attempts were made to rent that unit or the next available unit of comparable or smaller size to tenants having a qualifying income before any unit in the building was or will be rented to tenants not having a qualifying income.
- 11) If the income of the tenant of a low-income unit in a building increases above the limit allowed in IRC Section 42(g)(2)(D)(ii), the next available unit of comparable or smaller size in the building was or will be rented to tenants having a qualifying income.
- 12) An extended low-income housing commitment as described in IRC Section 42(h)(6) was in effect (for buildings subject to Section 7108(c) of the Omnibus Budget Reconciliation Act of 1989).

- 13) All low-income units in the project were used on a non-transient basis except for permanent supportive housing for the homeless provided under IRC Section 42(i)(3)(B)(iii) or single room occupancy units rented on a month-to-month basis under IRC Section 42(i)(3)(B)(iv).
- 14) The project was continually in compliance with the Violence Against Women Reauthorization Act of 2013, as amended, and all applicable implementing regulations.

Additional Reporting as Required: The owners of all LIHTC projects will also be required to submit to RIHousing information on tenant income, occupancy, and rent for each low-income unit, in the form and manner designated by RIHousing. RIHousing reserves the right to require owners of all low-income projects to submit additional information as it deems necessary.

The HERA included a provision directing state HFAs to collect and submit to HUD demographic and economic information on tenants living in LIHTC properties, including LIHTC projects in the extended use period. RIHousing requires owners/agents to upload and report tenant data monthly utilizing the RIHousing's online reporting system which allows property managers to enter tenant information directly into a web-based compliance reporting system. The information is immediately uploaded to RIHousing's online reporting system and is then transmitted directly to HUD.

C. Records Review

In accordance with Section 26 CFR 1.42-5(c)(2)(ii), all projects will be monitored for compliance by the end of the second calendar year following the year the last building in the project is placed in service. Subsequently, IRS regulations require that at least once every 3 years, state agencies conduct on-site inspections of all buildings in the project. These inspections will include a sample size in accordance with IRS guidance of the project's low-income units and review the certifications and supporting documentation along with the rent records for all the tenants living in the units. Properties directly financed by RIHousing and/or monitored under other federal or state programs administered by RIHousing will be reviewed annually. Additionally, LIHTC projects whose operations do not meet RIHousing's financial and operating management standards may be subject to more frequent examinations.

RIHousing reserves the right to perform a records review of any low-income housing project at least through the end of the compliance period and for any additional term, as defined in the RIHousing extended use compliance monitoring policy.

D. Inspection

RIHousing may conduct annual physical property and unit inspections, as well as tenant file reviews, on all of the LIHTC developments monitored by RIHousing. RIHousing will randomly select the low-income units to be inspected in each development. The number of units to be inspected will be a sample size in accordance with IRS guidance.

Inspections of buildings, grounds and LIHTC units will be conducted using HUDs Uniform Physical Conditions Standards (“UPCS”) protocol.

RIHousing retains the right to perform an on-site inspection of any low-income housing project at least through the end of the compliance period and for an additional term, as defined in the RIHousing extended use compliance monitoring policy.

E. Notification of Non-Compliance

RIHousing defers to the Guide for Completing Form 8823 Low-Income Housing Credit Agencies Report of Noncompliance or Building Disposition (the “Guide”) to evaluate non-compliance findings. The scope of the Guide is limited to guidelines for preparing Form 8823 for submission to the IRS. Taxpayers are responsible for evaluating the tax consequences of noncompliance with IRC Section 42. The Guide is available on the IRS website at: <https://www.irs.gov/pub/irs-utl/lihc-form8823guide.pdf>

RIHousing will look to the Guide in evaluating compliance with IRC Section 42 and in determining whether a notice of noncompliance should be issued. As outlined in IRC Section 42(m)(1)(B)(iii), RIHousing or its agent has the responsibility to notify the IRS of non-compliance with the LIHTC provisions by completing Form 8823 “Low-Income Housing Credit Agency Report of Non-Compliance.” In the event that RIHousing or its agent learns of an event of non-compliance, it will send a letter to the project’s owner describing the condition and, where appropriate, recommending actions to correct the problem. The agency shall retain records of non-compliance or failure to certify in accordance with Treasury regulations.

The development shall have 30 days from the date of the notice to correct and supply proof that the noncompliance has been corrected (e.g., copies of income certifications/lease/rent rebate, etc.).

If RIHousing determines that the clarification from the owner on the noncompliance issue establishes that the owner was always in compliance, then no Form 8823 is issued, and the owner is notified within 5 business days.

If RIHousing determines that there was noncompliance and the issue is now remedied, then Form 8823 will be filed with the IRS and the owner will be notified no later than 45 days after the end of the time allowed to the owner to take remedial action.

G. Casualty Loss

Unfortunately, disasters or accidents sometimes damage or destroy LIHTC units or properties. When these occur, it is the responsibility of the owner/agent to report the loss to RIHousing as soon as possible after an incident that results in a unit or building going off-line. Furthermore, the owner must submit a plan to RIHousing that sets a timeframe for restoration of the lost buildings or units.

Casualty loss that is not part of a presidentially declared disaster invokes no recapture if the loss is returned to a good condition within a reasonable period. This period is no more than 24 months after the end of *the year* that loss occurred. However, credits cannot be claimed while the unit(s) or building(s) are offline. For presidentially declared disasters, both recaptured and disallowance of credits are avoided if the loss is restored in a *reasonable period*. In the case of a declared disaster, the maximum reasonable period is 25 months *after the month* that a disaster is declared. For either type of casualty loss, RIHousing may impose a lesser reasonable period based on specific details as to the severity of loss.

For LIHTC projects, RIHousing must report the loss and restoration to the IRS. If the units have not been fully restored, RIHousing will submit a copy of the owner's plan and timeframe for replacement along with an uncorrected Form 8823 to the IRS. Once all units have been restored and are available for occupancy, RIHousing will issue a corrected Form 8823 to show the units are back in compliance.

If an owner fails to report a casualty loss to RIHousing promptly, RIHousing will report the incident as noncompliance to the IRS using Form 8823 as soon as compliance staff becomes aware that a loss event occurred.

Displaced Persons. For a period after a presidentially declared disaster, LIHTC properties across the nation may house persons displaced by the disaster *regardless of their income*. RIHousing will issue bulletins following specific disasters, along with directions and how long the temporary allowance to house disaster victims will last.

H. Liability of the Owner

Compliance with the requirements of IRC Section 42 is the responsibility of the owner of the building for which the credit is allowable. RIHousing's obligation to monitor for compliance with the requirements of IRC Section 42 does not make it responsible for the owner's noncompliance.

I. Annual Compliance Training

During the 15-year compliance period, the owner must certify that at least one member of the on-site management staff attended annual training specific to the LIHTC program and provided by a 3rd party vendor, or, with prior written approval of RIHousing, by the management company's in-house compliance department. A copy of the training certifications must be submitted to RIHousing by January 31st of each year.

VIII. EVENTS OF RECAPTURE

A full recapture of credits occurs if the building fails to meet the minimum set-aside requirement. A partial recapture of credits occurs if the building's low-income occupancy percentage decreases, but not below the minimum set-aside level, and/or if eligible basis decreases. The potential effect of non-compliance is to increase taxes in the year of non-compliance based on all previous years that the credit was earned. The excess of the credit actually earned each year over the credits that would be allowed if the credits were claimed ratably over the fifteen-year compliance period (the accelerated portion of the credit) plus interest is recaptured. In this event, IRS Form 8611 "Recapture of Low-Income Housing Credit" must be filed by the project's owner and retained for 3 years following the Compliance Period.

It is important to note that there are additional items that trigger recapture. Please refer to IRC Section 42 and the RIHousing website for important Program Bulletins and Notices regarding changes/revisions to policies.

IX. COMPLIANCE MONITORING FEES

A. Compliance Monitoring Fees:

In order to offset the cost of compliance monitoring, a low-income housing unit fee will be assessed to all LIHTC developments per LIHTC unit. This fee will be due and payable no later than March 31st of each year. This fee will be reviewed on an annual basis and may be increased to cover administrative costs at RIHousing's discretion. In accordance with the RIHousing Extended Use Compliance Monitoring Policy, fees will be assessed through the term of the Extended Use Period. RIHousing reserves the right to increase compliance monitoring fees for Owners who elect income averaging.

X MISCELLANEOUS

RIHousing recommends that owners/agents stay current with updated information by logging into our website at <https://www.rihousing.com/> and viewing and downloading important information outlined in our Program Bulletins and Notices.

XI. APPROVAL OF THE GOVERNOR

I, Daniel J. McKee, Governor of the State of Rhode Island, do hereby signify my approval of this 2023 LIHTC Qualified Allocation Plan for the distribution of federal LIHTCs in this State, in conformance with IRC Section 42.

Signed: _____
Daniel J. McKee, Governor

Date: _____, 2022
