Scope of Work

RIHousing seeks to engage Rhode Island Department of Health (“DOH”) certified Inspectors (“Inspectors”) and inspection firms employing certified Inspectors, that can provide the wraparound services of conducting Certified Environmental Lead Inspections (“CELIs”) and Lead Inspection Risk Assessments (“LIRAs”) which provide lead-based paint risk assessments, paint inspections, soil sampling, dust wipe sampling and clearance examinations for RIHousing LeadSafe Homes Program projects. The terms “Inspectors,” “inspection firms” and “firms” will be used interchangeably throughout this Scope of Work.

Services are required as needed, on an ongoing basis. Continued participation in the program is dependent upon, where appropriate, maintaining appropriate licenses and ongoing training requirements. From time to time, RIHousing may issue updated RFPs for these services, which may require vendors to reapply.

I. Services to be Provided

1. Lead Inspections - Certified Environmental Lead Inspection (“CELI”)

DOH-certified firms will provide CELI services, to include comprehensive, limited, demo downgrade, comprehensive clearance and clearance inspections on single family, multi-family, and multi-use properties.

All inspection and sampling procedures, result interpretations, report generation, reporting requirements, and timing for delivery of work must, at a minimum, be performed in accordance with the Rhode Island Rules and Regulations for Lead Poisoning Prevention (R23-24.6-PB) and RIHousing’s LeadSafe Homes Program Inspector Protocols.

All inspection documentation, including reports and certificates, must be legible and in a format approved by the DOH and RIHousing.

All inspections will be modified to meet additional U.S. Department of Housing and Urban Development requirements which are:

- a. All four walls in every room area must be separately tested by XRF sampling and results recorded.
- b. A total of 8 dust samples will be taken in each unit, 2 samples in each common stair/hall and an additional blank sample per project/day.

2. Risk Assessment - Lead Inspections and Risk Assessments (“LIRA”)

LIRAs are on-site investigations to determine the existence, severity, and location of lead-based paint hazards which are accompanied by a report explaining the results and options for reducing lead-based paint hazards. The LIRA being provided by firms must cover the following, at a minimum:

RFP/RFQ Title: LeadSafe Homes Program Lead Inspector/Risk Assessors
Respondent Name: _____

- Identification of the existence, nature, severity, source and location of lead-based paint hazards, including soil and dust hazards as well as paint (or documentation that no such hazards have been identified);
- Description of the options for controlling lead hazards in the event that hazards are found, including interim controls and abatement measures;
- Suggestions on how to keep in a non-hazardous condition lead-based paint that will remain in a dwelling after present hazards are corrected; and
- Recommended changes to the management and maintenance systems. By considering all hazards and examining resident and owner practices, the assessment can determine appropriate ways to control hazards and modify management practices so that the change of hazards recurring is reduced.
