Attachment A

Scope of Work

RIHousing seeks to engage qualified laboratories to provide quantitative analytical services to test for and report on the presence of lead in dust, paint, water, and soil. Timely sample preparation, analysis, and result reporting are critical to the LSHP operation. All laboratories submitting proposals must, at a minimum, be ELLAP certified.

Laboratory services shall include the following:

1. Analysis of environmental samples to the following tolerances:
 - a. dust wipes – in micrograms per square foot to a tolerance of <10.0 µg/sq. ft.
 - b. paint chips – in parts per million to a tolerance of <10.0 ppm
 - c. water – in parts per billion to a tolerance of <5.0 ppb
 - d. soil – in parts per million to a tolerance of <10.0 ppm
2. Provision of laboratory analysis services Monday through Friday, and Saturday by special arrangement.
3. Supply of media sampling collection materials for dust wipes, paint, water and soil, including pre-printed chain of custody forms, “Ghost” wipes, centrifuge collection tubes, zip-lock bags, and prepared water collection bottles.
4. Completion of analysis within the following turn-around-times (after receipt of media samples):
 - a. 2 hours – except water
 - b. Same day by 4:00 p.m. Eastern Standard Time – except water
 - c. Next day by 4:00 p.m. Eastern Standard Time
 - d. Within 3 days
 - e. Within 5 days
 - f. Water – Next Day, 3 Day, and 5 Day
5. Electronic and hard-copy transmission of analysis reports to the LSHP and participating Inspector (defined and described below), including original Chain of Custody (“COC”) forms.
6. Compliance with media sample submission procedures as follows.

The LSHP works with Rhode Island Department of Health Certified Environmental Lead Inspection firms (“Inspection Firms”) who employ one or more Certified Environmental Lead Inspectors (“Inspectors”). Inspection Firms and Inspectors

provide services to identify lead hazards, including the collection of dust wipes, paint chips, soil and water samples from properties for laboratory analysis. The LSHP will provide the chosen laboratory with a list of Inspection Firms and Inspectors approved to submit samples for analysis. The LSHP will only pay for the analysis of LSHP samples submitted by LSHP staff or by those Inspection Firms and Inspectors on the approved LSHP list.

A laboratory may already serve one or more Inspection Firms or Inspectors. As a result, it is important that the laboratory establish and utilize a system to keep LSHP and other sample submissions separate. In the past, the LSHP has provided Inspection Firms and Inspectors with COC forms pre-printed with LSHP account and contact information for use with LSHP samples. A similar system will be developed with the chosen laboratory to maintain sample submission segregation.

Sample media will be delivered to the chosen laboratory via a commercial carrier such as UPS, or FedEx, with the bill of lading number identifying the package indicated on the COC form.

7. Analysis of samples at the volume described below. In a typical year, the LSHP produces approximately 150 units. Inspections are performed: (1) to identify hazards prior to any lead hazard reduction/control work (“@ CELI” on the table below), and (2) upon completion of the work to verify the cleaning meets regulation standards (“@ Clearance” on the table below). In years when funding commitments allow advanced production, the LSHP produces as many as 350 units.

The total number of samples per residential unit anticipated for submission:

Media	@ CELI	@ Clearance	Total
Dust Wipes	9	9	18
+ Common Areas	2	2	4
Paint	4	0	4
Soil	6	6	3
			29 x 150 units = 4,350
Water	1	0 (occasionally)	1 x 150 units = 150
